PREFACE

The *Life Insurers Fact Book*, the annual statistical report of the American Council of Life Insurers (ACLI), provides information on trends and statistics about the life insurance industry. ACLI represents approximately 280 legal reserve life insurer and fraternal benefit society member companies operating in the United States. These member companies represent 95 percent of industry assets, 92 percent of life insurance premiums, and 97 percent of annuity considerations in the United States.

ACLI advocates the interests of life insurers and their millions of policyholders before federal and state legislators, state insurance departments, administration officials, federal regulatory agencies, and the courts. ACLI expands awareness of how the products offered by life insurers—life insurance, pensions, annuities, disability income insurance, and long-term care insurance—help Americans plan for and achieve financial and retirement security. Unless otherwise noted, the data reported in the *Life Insurers Fact Book* are ACLI tabulations of the National Association of Insurance Commissioners (NAIC) 2015 statutory data for the life industry as of June 2016, and represent U.S. legal reserve life insurance companies and fraternal benefit societies. NAIC data are used by permission. The NAIC does not endorse any analysis or conclusions based on use of its data.

We would like to acknowledge ACLI staff who prepared the *Life Insurers Fact Book 2016*: Michele Alexander, Jim Bishop, Khari Cook, Ken Shields, Jiangmei Wang, and Matt Wellens.

Andrew Melnyk, Ph.D. Vice President, Research

METHODOLOGY

Unless otherwise noted, data in the *Life Insurers Fact Book* come from the annual statements of life insurers filed with the National Association of Insurance Commissioners (NAIC). These data represent the U.S. insurance business of companies (or branches of foreign companies) regulated by state insurance commissioners. Unless otherwise noted, data for years after 2002 include information for both life insurance companies and for fraternal benefit societies that sell life insurance products. Prior to 2003, data do not include fraternal benefit insurance sales. Where fraternal data are included, they are included as individual, rather than group, business. Data on life insurance sales by savings banks and the U.S. Department of Veterans Affairs are provided separately in Chapter 1 only.

Most of the *Fact Book* data are reported in standardized tables that summarize information for the current year (2015 data), last year (2014 data), and 10 years previous (2005 data), along with the average annual percentage change over the last year and the last ten years. In cases where 2005 data are not available, then the oldest available data are reported.

Company ownership is reflected on a fleet basis. That is, if a stock company is owned by a mutual parent, both are now classified as mutual companies. The same is true for insurance companies owned by non-U.S. parents. This affects most notably tables in Chapter 1. The assets of a fleet typically differ slightly from the sum of the assets of individual companies in the fleet, because the net value (stockholder equity) of the subsidiary is counted at both the subsidiary and the parent level. This same double-counting discrepancy exists for liabilities, investment income, and surplus. Adjustments have been made, when possible, to eliminate the double-counting of assets, liabilities, investment income, and surplus.

Chapter 4 presents calculations of gross and net rates of return on investment based on formulas traditionally used in the industry. The net rate of return is calculated as:

(net investment income)/ 2-year average net invested assets. The formula for average net invested assets is (current year net invested assets + current year investment income due – current year borrowed money – current year payable for securities – current year capital notes – current year surplus notes + previous year net invested assets + previous year investment income due – previous year borrowed money – previous year payable for securities – previous year capital notes – previous year surplus notes – net investment income) / 2.

The gross rate of return on fixed-rate assets is calculated as:

(Gross investment income on bonds)/ average net investment in bonds. The denominator is (CY bonds + PY Bonds – gross investment income on bonds) /2.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in numbered footnotes.

'Data represent net business.

²Beginning in 2001, excludes deposits for guaranteed interest contracts due to codification.

³Includes supplementary contracts with life contingencies.

⁴Beginning in 2001, excludes payments under deposit-type contracts, and includes annuity withdrawals of funds, for which a comparable amount in prior years is not available.

⁵Excludes payments under deposit-type contracts.

⁶Includes some disability benefits and retained assets.

⁷Includes commissions and expense allowance on reinsurance ceded. For 2014 and 2015, includes amortization of interest maintenance reserve. ⁸Includes stock companies owned by mutual holding companies.

⁹Includes stock companies owned by fraternal benefit societies.

¹⁰Includes farm bureau, reciprocal, and risk retention groups.

includes faith bureau, recipiocal, and tisk recention groups.

FACT BOOK 2016

U.S. life insurance companies sell the vast majority of life insurance and annuities purchased in the United States. Fraternal organizations and federal government agencies are also in the marketplace, and certain Canadian life insurers with U.S. legal reserves are allowed to sell insurance directly from their Canadian offices to U.S. purchasers. Data from Canadian companies are not included in this chapter.

At the end of 2015, 814 life insurance companies were in business in the United States (Table 1.1). The number of active companies peaked in 1988 (Table 1.7), and has since fallen steadily, mostly due to company mergers and consolidations. This streamlining has helped to reduce operating costs and general overhead, and has significantly increased efficiency.

ORGANIZATIONAL STRUCTURE Stock and Mutual Life Insurers

Most life insurers are organized as either stock or mutual companies. Stock life insurance companies issue stock and are owned by their stockholders. Mutual companies are legally owned by their policyholders and consequently do not issue stock.

Stock life insurers can be owned by other stock life insurance companies, mutual life insurance companies, or companies outside the life insurance industry. Only policyholders own a mutual company, however. If a stock company is owned by a mutual company, that stock company is categorized as a mutual company. The majority of life insurers are stock companies—616, or 76 percent of the industry (Table 1.1). Many life insurers are affiliated with other life and non-life insurance companies in fleets with a single owner.

Besides consolidation, another recent trend in the life insurance industry is demutualization and the formation of mutual holding companies—a structure that allows easier and less expensive access to capital. In creating a mutual holding company, the mutual insurer either starts a stock insurance company or acquires a stock company. For data in this chapter, mutual holding companies are included in the totals for pure mutual companies.

Together, stock and mutual life insurers provide most of the insurance and annuities underwritten by U.S. organizations (Table 1.2). Mutual companies had \$6.2 trillion of life insurance in force in 2015 and stock life insurers, \$14 trillion. Fraternal societies and other type companies underwrite the remainder of U.S. insurance.

Other Life Insurance Providers

Fraternal benefit societies provide both social and insurance benefits to their members. These organizations are legally required to operate through a lodge system, allowing only lodge members and their families to own the fraternal society's insurance. In 2015, there were 81 fraternal life insurance companies that had \$356 billion of life insurance in force and \$154 billion in assets (Tables 1.1 and 1.2).

The Department of Veterans Affairs provides protection to U.S. veterans under six insurance programs: U.S. Government Life Insurance, National Service Life Insurance, Veterans' Special Life Insurance, ServiceDisabled Veterans Insurance, Veterans' Reopened Insurance, and Veterans' Mortgage Life Insurance. The federal agency also oversees three life insurance programs for members of the uniformed services: Servicemembers' Group Life Insurance, SGLI Family Coverage, and Veterans' Group Life Insurance.

Veterans' Special Life Insurance in force totaled \$1.7 billion in 2015 (Table 1.3). U.S. Government Life Insurance, covering World War I veterans, had \$1 million of insurance in force in 2015, while National Service Life Insurance, for veterans of World War II and those covered by the Insurance Act of 1951, totaled \$4.5 billion. Service-Disabled Veterans Insurance—for veterans separated from service after April 1951 who have a service-connected disability but are otherwise insurable—had \$2.8 billion of insurance in force in 2015.

The largest life insurance plan, Servicemembers' Group Life Insurance, had \$824 billion of insurance in force with 2.3 million policies at year-end 2015 (Table 1.3).

EMPLOYMENT

The insurance industry plays an important role in the nation's economy. In 2015, U.S. insurers employed 2.5 million individuals in all of their branches, a 3.2 percent increase from a year earlier (Table 1.4).

Government data on employees of insurance agencies and home offices in 2015 show 1.48 million insurance home-office personnel (325,500 in life insurance) and 1.1 million insurance agents, brokers, and service personnel.

FOREIGN OWNERSHIP

The proportion of life insurance companies operating in the United States that are foreign-owned was 11.9 percent in 2015 (Table 1.5).

Practically, the same countries have fielded the major foreign players in the U.S. market since the mid-1990s. Among life insurance companies operating in the United States during 2015, Canada controlled 27 companies; Switzerland, 14; Bermuda, 14; Japan, 10; France, 8; the United Kingdom, 6; Germany, 5; the Netherlands, 4 (Table 1.6).

Number of U.S. Life Insurers, Organizational Structure								
In business	at year's end	Average annual percent change

2 assets

Assets held by life insurers back the companies' life, annuity, and health liabilities. Accumulating these assets—via the collection of premiums from policyholders and earnings on investments—provides the U.S. economy with an important source of investment capital. Life insurers held \$6.5 trillion in assets in 2015 (Table 2.1). Assets of U.S. life insurers rose 1 percent during 2015 (Table 2.2).

Financial instruments comprise most life insurance company assets and can generally be classified into:

- Bonds, both corporate and government
- Stocks
- Mortgage and real estate holdings
- Policy loans

A life insurer divides its assets between two accounts that differ largely in the nature of the liabilities or obligations for which the assets are being held and invested. The *general account* supports contractual obligations for guaranteed, fixed-dollar benefit payments, such as life insurance policies. The *separate account* supports liabilities associated with investment risk pass-through products or lines of business, such as variable annuities, variable life insurance, and pension products.

State laws allow assets in separate accounts to be invested without regard to the restrictions usually placed on the general account. A separate account portfolio might comprise only common stocks or bonds or mortgages, or some combination of these and other investments. Separate account assets totaled \$2.4 trillion at the end of 2015—down .4 percent from the previous year (Table 2.2). General account assets amounted to \$4 trillion in 2015, up 2 percent from 2014.

BOND HOLDINGS AND ACQUISITIONS

Bonds are publicly traded debt securities. Often referred to as fixed-income securities, bonds generally offer low risk and a greater certainty of rates of return. Not only does the borrower (seller of the bond) agree to pay a fixed amount of interest periodically and repay a fixed amount of principal at maturity, but the obligation to make payments on the bond takes precedence over other claims of lenders and stockholders.

At year-end 2015, 49 percent of life insurer assets were held in bonds. Total bond holdings of both general and separate accounts amounted to \$3.2 trillion, up \$95 billion from 2014 (Tables 2.1–2.2). Holdings of bonds in separate accounts increased 13 percent in 2015 to \$368 billion. Bond holdings in general accounts increased to \$2.8 trillion (Table 2.2).

Bonds are issued by a variety of borrowing organizations, including domestic and foreign corporations, the U.S. Treasury, various U.S. government agencies, and state, local, and foreign governments. Long-term U.S. Treasury securities in the general account totaled \$140 billion, U.S. government obligations \$51 billion, and foreign government bonds \$77 billion (Table 2.3). The largest portion of long-term bonds was in unaffiliated securities, with both U.S. and foreign investments totaling \$1.9 trillion, or two-thirds of all long-term general account bonds (68%). Long-term bonds issued by U.S. states, territories, and political subdivisions came to \$47 billion, while bonds issued for revenue, assessment, and industrial development totaled \$110 billion.

Types of Bonds

Corporate Bonds

Life insurers are significant investors in the corporate bond market, having been the largest institutional holder of corporate bonds issued in U.S. markets since the 1930s. Private or direct placements—where the financial institution negotiates directly with the corporation over the terms of the offering—account for a sizable share of life insurer investments in corporate bonds. Life insurance companies are the major lenders in the direct placement market.

Corporate debt issues in 2015 represented the largest component of life insurer assets at 33 percent (Table 2.1). Corporate debt issues totaled \$2.1 trillion by year's end (Table 2.2). These investments have generally increased steadily for many years and have grown at a 1.5 percent annual rate in the last decade.

Government Bonds

Bonds of the U.S. government include U.S. Treasury securities and others issued by federal agencies. Government securities rose to \$496 billion at the end of 2015, up \$17 billion from the previous year (Tables 2.1–2.2). These holdings include U.S. Treasury and federal agency guaranteed obligations, special revenue, and other issues of the 50 states, District of Columbia, Puerto Rico, and U.S. territories and possessions and their political subdivisions.

The vast majority of long-term securities were invested in U.S. government securities (\$415 billion) as opposed to those of foreign governments and international agencies (\$81 billion), such as the International Bank for Reconstruction and Development (Table 2.1).

Characteristics of Bonds Maturity

Bonds have limited lives and expire on a given date, called the issue's maturity date. Thirty-one percent of general account bonds held at year-end 2015 had a maturity between five and 10 years. Another 25 percent matured between one and five years, 21 percent had a maturity over 20 years, 16 percent matured between 10 and 20 years, and 8 percent had a maturity of one year or less (Table 2.4).

At the time of purchase, 38 percent of bonds had a maturity date of 20 years or more, while 33 percent had a maturity date of 10 to 20 years (Table 2.5). Bonds with maturity dates of five to 10 years (25%), and less than five years (4%) made up the remainder.

Quality

In purchasing a bond, investors examine its quality. The higher the quality of the bond, the lower the risk, and the higher the degree of assurance that investors will get their money back at maturity. Consequently, high-quality bonds are ideal for long-term capital accumulation.

Bond holdings can be categorized among six quality classes established by the National Association of Insurance Commissioners. At year-end 2015, 94 percent of total general account bonds were investment grade, Classes 1 and 2 (Table 2.6). The percentage of total bonds in or near default (Class 6) was 0.1 percent.

Of the \$2.9 trillion in general account bonds held by insurance companies in 2015, \$2.1 trillion was invested in publicly traded bonds and \$845 billion in privately traded bonds (Table 2.6). Ninety-six percent of the publicly traded bonds were investment grade (Classes 1 and 2) compared with 90 percent of the privately traded bonds. Of the publicly traded bonds, 0.05 percent were in or near default (Class 6), compared with 0.2 percent of the privately traded bonds.

STOCK HOLDINGS AND ACQUISITIONS

Life insurers' changing portfolios reflect long-term shifts in investment demand. Since the early 1990s, the share of assets held in stocks has been increasing. The average annual growth in equity holdings was 5 percent between 2005 and 2015 (Table 2.2).

Historically, stocks had been a small percentage of total assets for reasons rooted in both the investment philosophy of the industry and the laws regulating life insurance. Stocks had not been heavily used as a major investment medium for funds backing life insurance policies because of the policies' contractual guarantees for specified dollar amounts.

Part of the investment shift is due to changes in the relative yields of various investment types. Other factors are the introduction of variable life insurance and the growth in funding pension plans with equity securities of life insurers and variable annuities. State laws generally permit certain assets of these and other plans to be maintained in an account separate from a company's other assets, with up to 100 percent invested in stocks or other equities.

Life insurer holdings of corporate stock fell 4 percent between 2014 and 2015 to \$2 trillion, accounting for 31 percent of total assets. At year-end 2015, \$1.9 trillion, or 95 percent, of stock held by life insurance companies was in separate accounts (Table 2.1-2.2).

Common stock accounted for \$2 trillion, or 99 percent, of all stock held by life insurers in 2015 (Table 2.1). Holdings of common stock decreased 4 percent in 2015, while there was a 7 percent increase in preferred-stock holdings (Tables 2.1–2.2).

MORTGAGES

Mortgages generally are considered riskier fixed-income investments than bonds. Over the past few decades, life insurers have slightly reduced the relative size of their mortgage portfolios in favor of other investments, including mortgage-backed securities (MBS). In 2015, mortgages increased 11 percent to \$437 billion, accounting for 7 percent of combined account assets (Tables 2.1–2.2).

Properties underlying life insurer holdings of nonfarm, nonresidential mortgages cover a broad range of commercial, industrial, and institutional uses. Among them are retail stores and shopping centers, office buildings and factories, hospitals and medical centers, and apartment buildings. Commercial mortgages have grown in importance, representing 93 percent (\$404 billion) of U.S. mortgages held by life insurers at the end of 2015 (Table 2.1). Mortgages for residential properties were \$14 billion, or 3 percent of total mortgages held by life insurers on U.S. properties. Farm mortgages were \$19 billion, accounting for 4 percent of total mortgages in 2015.

Almost all of the mortgages held by life insurers were in good standing (99.5%) in 2015. Of industry-held mortgages, only 0.5 percent were either restructured, overdue, or in foreclosure in 2015 (Table 2.7).

At year-end 2015, \$9 billion (2%) was held in general account mortgages with a loan-to-value ratio above 95 percent, compared with \$369 billion (89%) in mortgages with a loan-to-value ratio below 71 percent (Table 2.8).

REAL ESTATE

U.S. life insurers' holdings of directly owned real estate were \$44 billion at the end of 2015. This represents a 41 percent increase from 2014 (Tables 2.9).

By the end of 2015, real estate amounted to .7 percent of life insurers' assets (Table 2.1). Real estate holdings in separate accounts increased \$11 billion during the year as real estate in general accounts increased \$2 billion (Table 2.2).

Real estate held to produce income totaled \$38 billion, or 86 percent of all real estate owned, while real estate held for sale amounted to \$553 million (Table 2.9, Figure 2.4). The remainder was in land and property held for company use, primarily home and regional offices.

POLICY LOANS

Life insurance companies can loan money to policyholders up to the cash value of their life insurance. Life insurers must make these policy loans from funds that otherwise would be invested. Since premium rates are based in part on an anticipated investment return, interest must be charged on the loans. Because the amount of a policy's protection is reduced by the amount of the loan, life insurers advise policyholders that an outstanding loan can seriously impair a family's insurance planning. The policy loan amounts shown in Tables 2.1–2.2 do not include loans made to policyholders by banks or other lending institutions holding borrowers' life insurance policies as collateral.

Life insurer loans to policyholders against the cash value of their life insurance amounted to \$135 billion by yearend 2015, up 1 percent from the loans outstanding a year earlier (Tables 2.1–2.2). Policy loans accounted for 2 percent of company assets at the end of 2015.

FOREIGN-CONTROLLED ASSETS

Foreign-controlled assets were \$1.3 trillion, or 19.9 percent of total industry assets in 2015, up from 2014 (Table 2.10). Canada, followed by the Netherlands, the United Kingdom, and France own the most foreign-controlled assets of U.S. life insurers.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Beginning with 1962, data include assets in separate accounts. Data represent U.S. life insurers and, as 2003, fraternal benefit societies.

*Excludes an estimated \$600 million of securitized policy loans.

‡Includes fraternal benefit societies.

$\mathcal{3}_{\mathsf{liabilities}}$

The liabilities of U.S. life insurers primarily comprise the reserves held by each insurer to back its obligations to policyholders and their beneficiaries. Of the many different kinds of reserves, policy and asset fluctuation reserves are the most important. Liabilities also include small amounts of other funds and obligations.

Based on standard accounting principles applied to all businesses, total liabilities plus the company's net value must equal its total assets. Net value is a company's surplus plus its capital stock and is available to support policyholder claims if necessary.

POLICY RESERVES

Policy reserves concern an insurer's obligation to its customers arising from its product in force. State law requires each company to maintain its policy reserves at a level that will assure payment of all policy obligations as they fall due. That level is calculated on an actuarial basis, taking into account funds from future premium payments, assumed future interest earnings, and expected mortality experience. At the end of 2015, policy reserves of U.S. life insurers totaled just over \$5 trillion, 1.4 percent higher than 2014 (Table 3.1).

Policy reserves are held and identified for each type of business conducted by a life insurer:

- Life insurance policies
- Annuities and supplementary contracts
- Health insurance policies

The composition of life insurer policy reserves has changed over the years, reflecting a shift in the basic types of business undertaken. Annuity contract reserves now account for a larger proportion of total policy reserves, while reserves set aside for life insurance policies have a lesser share.

In 2015, reserves for life insurance comprised 29 percent of total policy reserves, at \$1.5 trillion (Figure 3.2, Table 3.2). This proportion has shrunk from 1980, when life insurance products commanded 51 percent of total reserves (Table 3.6). In 2015, these reserves consisted of \$1.3 trillion for individual life policies, \$170 billion for group policies, and less than \$1 billion for credit life policies (Table 3.2).

By contrast, reserves for annuities and supplementary contracts climbed to two-thirds of total reserves in 2015 (66%), or \$3.3 trillion, from 44 percent in 1980. Much of the increase reflects the strong growth in retirement plans administered by life insurers.

In 2015, annuity reserves consisted of \$2.3 trillion for individual annuities, up two percent from 2014, and \$1 trillion for group annuities, down about three percent. Both general account annuity reserves and separate account annuity reserves increased by four percent (Table 3.2). Group annuity reserves had fallen significantly in 2001, primarily due to accounting codification rather than actual fluctuation. In 2000, liabilities for guaranteed interest contracts (GICs) and premium and other deposit funds had been reported as annuity reserves; however, as of 2001 these amounts were counted as liabilities for deposit-type contracts. Since most GICs and other deposit-type funds are under group contracts, this accounting change has had a substantial effect on group annuity reserves. Reserves held under supplementary contracts with life contingencies in 2015 totaled \$23 billion, and for health insurance policies, \$242 billion.

DEPOSIT-TYPE CONTRACTS

Contracts issued by life insurers that do not incorporate mortality or morbidity risks are known as deposit-type contracts. Benefit payments under these contracts are not contingent upon death or disability as they are in life and disability insurance contracts, or upon continued survival as they are in annuity contracts. Categories of deposittype contracts, as defined by the National Association of Insurance Commissioners (NAIC), include GICs, supplementary contracts without life contingencies, annuities certain, premium and other deposit funds, dividend and coupon accumulations, lottery payouts, and structured settlements.

Under codified statutory accounting practices implemented in 2001, cash inflows and outflows on deposit-type contracts are no longer reported as income and expenditure. Instead, they are recorded directly as increasing or decreasing reserves. During 2015, \$183 billion was deposited to these contracts and \$177 billion was withdrawn, with a total reserve of \$470 billion at year's end (Table 3.3).

In 2015, premium and other deposit funds remained the largest category of the deposit-type business with \$109 billion in deposits, \$115 billion in payments, and \$209 billion in reserve at year-end. GICs received \$49 billion from policyholders and paid out \$40 billion in 2015, leaving a reserve of \$153 billion at year's end.

ASSET FLUCTUATION RESERVES

Besides policy reserves, insurers are required to establish two statutory reserves to absorb gains and losses in their invested assets.

The asset valuation reserve (AVR) absorbs both realized and unrealized, credit-related capital gains and losses. The AVR consists of a default component, which provides for credit-related losses on fixed-income assets, and an equity component, which provides for all types of equity investments. The interest maintenance reserve (IMR) captures all realized, interest-related capital gains and losses on fixed-income assets. The IMR amortizes these gains and losses into income over the remaining life of the investments sold.

In 2015, the industry's total AVR decreased 6 percent to \$49 billion, and its IMR decreased 11 percent to \$24 billion (Table 3.1).

OTHER LIABILITIES

In addition to reserves, other liability funds of U.S. life insurers at the end of 2015 included \$44 billion in policy and contract claims; \$18 billion set aside for the following year's dividend payments to policyholders; and \$433 billion for liabilities not directly allocable to policyholders—incurred expenses, mandatory reserves for fluctuations in security values, and insurance premiums paid in advance, for example (Table 3.1).

SURPLUS FUNDS AND CAPITAL STOCK

Surplus and capital amounted to \$383 billion for U.S. life insurers at the end of 2015 (Table 3.1). Surplus funds provide extra reserve safeguards for such contingencies as an unexpected rise in death rates among policyholders, unusual changes in the value of securities, and general protection for policy obligations. Several factors influence the amount of surplus that a life insurer retains, including company size, kinds of insurance written, mortality experience, general business conditions, and government regulation. Capital refers to the total par value of shares of the companies' capital stock.

CAPITAL RATIOS

One measure of the adequacy of a life insurer's surplus is its capital ratio: surplus funds plus capital stock plus AVR as a percentage of general account assets. Theoretically, the higher the capital ratio, the better a company is able to withstand adverse investment and mortality experience. However, the type of company and the distribution of its book of business can make comparisons among companies and with an industry wide average much less meaningful. In 2015, the aggregate capital ratio of U.S. life insurers was 10.7 percent (Table 3.4). Life insurance regulators created the risk-based capital (RBC) ratio to monitor life insurance company solvency. Risk-based capital, calculated according to an NAIC model law, is considered the minimum amount of capital an insurer needs to avoid triggering regulatory action. The RBC ratio is total adjusted capital divided by risk-based capital, for a threshold ratio of 100 percent. The ratio provides a means for evaluating the adequacy of an insurer's capital relative to the risks inherent in the insurer's operations. From 1993 when life insurers began reporting risk-based capital, the average RBC ratio rose steadily to a plateau of 290 percent in 1997, which remained unbroken until 2001. That year, the ratio jumped to 346 percent, mainly due to two changes enacted by NAIC: accounting codification and an adjusted RBC formula that reflects changed risks for assets. In 2015, the ratio decreased to 486 percent (Table 3.5).

Most companies have an RBC ratio well above the regulatory minimum level of 100 percent. By year-end 2015, 747 companies, or 94 percent of life insurers, had a ratio of 200 percent or more. These companies carried 99.3 percent of the industry's total assets.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

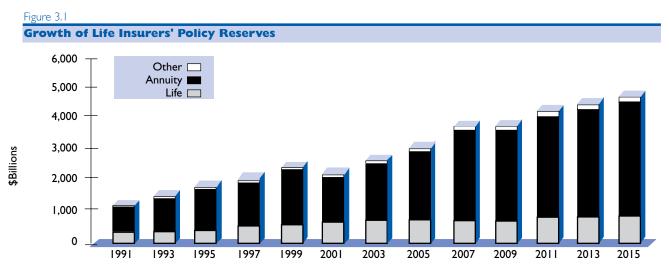

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in numbered footnotes. Data represent U.S. life insurers and fraternal benefit societies.

NC: Not calculated

¹Beginning in 2001, excludes reserves for guaranteed interest contracts (GICs).

²Prior to 2001, included supplementary contracts without life contingencies and policyholder dividend accumulations; beginning in 2001, also includes liabilities for GICs, and premium and other deposits.

³Includes insurance premiums paid in advance. The amount previously was included in non-reserve liabilities.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission. Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in numbered footnotes. Data represent U.S. life insurers and fraternal benefit socieites.

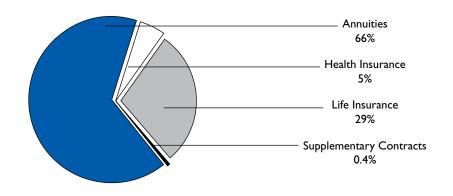

NC: Not calculated

As of 2001, excludes reserves for guaranteed interest contracts (GICs). Figures for GICs are presented in Table 3.3.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Before 1947, the business of health insurance departments of life insurers was not included in this series. Codification effective with 2001 Annual Statement filings changed the reporting of annuities. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

*Included with group annuities.

‡Includes fraternal benefit societies.

Beginning in 2001, excludes reserves for guaranteed interest contracts (GICs). Figures for GICs are shown in Table 3.3.

²Beginning in 2001, includes reserves for supplementary contracts with life contingencies; reserves for supplementary contracts without life contingencies are included in liabilities for deposit-type contracts in Table 3.3.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Capital ratio is equal to capital plus surplus plus the asset valuation reserve (AVR), or mandatory securities valuation reserve (MSVR) prior to 1992, divided by general account assets. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

‡Includes fraternal benefit societies.

The gross income of life insurance companies comes from two main sources: premiums paid by policyholders and earnings on investments. In 2015, total income of all U.S. life insurers increased 6.5 percent to \$1.1 trillion (Table 4.1). Insurance premiums and annuity considerations contributed 46 percent of total income. Investment earnings contributed 27 percent. The remainder of gross income came from amortization of interest maintenance reserve, commissions and expense allowance on reinsurance ceded, and miscellaneous income.

Under statutory accounting rules, net gain from (insurance) operations is calculated prior to net income. Net gain from operations equals gross income minus operating expenditures, policyholder dividends, and federal income taxes. Capital gains, net of tax, are then added to net gain from operations to calculate (after tax) net income.

PREMIUM INCOME

Premium receipts - derived from sales of life insurance, health insurance, and annuities - decreased 1.5 percent to \$649 billion in 2015 (Table 4.2).

The mix of premiums from life insurance and annuity considerations has changed markedly over time. Prior to 1986, premium receipts from life policies were greater than annuity considerations, but starting in 1986, annuity premiums have exceeded life insurance premiums (Table 4.10). By 2015, life policies accounted for just under one-fourth of premium receipts (24%), while annuity considerations contributed just over half (51%) (Figure 4.1).

Premiums for life insurance policies totaled \$156 billion in 2015, a 12.7 percent increase from the previous year (Table 4.2). Individual policy premiums accounted for the largest share at \$125 billion, or 80 percent. Most were renewals, representing \$88 billion, or 70.9 percent, of individual premiums (Table 4.3). Group insurance was the second-largest contributor to life insurance premiums at \$31 billion, or 20 percent of the total. Again, renewals constituted the largest portion at \$24 billion, or 78 percent, of all group premiums. Credit life provided \$669 million of all life insurance premiums (Table 4.2). Americans spent 0.96 percent of total disposable (aftertax) personal income on individual life insurance in 2015 (Table 4.5).

Annuity considerations decreased 7.9 percent in 2015 to \$333 billion (Table 4.2). Individual annuities provided \$209 billion in premium receipts, decreasing 15.6 percent from 2014. Of individual annuity considerations, first-year annuity considerations constitute the largest share of this category at \$100 billion, while group considerations counted renewals as the largest contributor with \$85 billion (Table 4.4). Individual annuity considerations amounted to 1.61 percent of disposable personal income in 2015 (Table 4.5).

Premiums for accident and health insurance decreased .9 percent to \$160 billion in 2015 (Table 4.1) with group premiums being the largest portion at \$101 billion, up 11.2 percent from 2014 (Table 4.2). Individual accident and health premiums decreased to \$58 billion, with the largest share at \$35 billion coming from guaranteed renewable contracts (Table 4.6).

INVESTMENT INCOME AND RATE OF RETURN

Net investment income of life insurance companies amounted to \$277 billion in 2015 (Table 4.7). The largest source of investment income was from bonds at \$142 billion, followed by common stock (\$93 billion) and mortgage loans (\$21 billion). Gross investment income increased 8.4 percent from 2014. Investment expenses, taxes, and deductions totaled \$12.5 billion, increasing 8.6 percent from the previous year.

As a way of tracking investment performance, life insurers routinely calculate their net rate of return on invested assets. The net rate of return on invested assets is determined by dividing net investment income by the two-year average of the net invested assets. The gross rate of return on total fixed income assets is calculated by dividing the gross investment income on bonds by the average net investment in bonds.

In 2015, life insurers' net rate of return on total assets was 4.81 percent, up slightly from a year earlier (Table 4.8). This net rate is an annual average based on aggregates of all U.S. life insurance companies after investment expenses, but before federal income taxes. Excluding separate accounts, the portfolio net rate of return on general account assets was 4.91 percent in 2015, down from 5.19 percent in 2014.

The gross rate of return on fixed-income assets measures the return on bonds, preferred stocks, and mortgages. It does not account for depreciation or investment expenses and excludes equity investments (other than preferred stocks), avoiding the uneven treatment of gains in the numerator and denominator of net rate data.

Gross rate data apply to fixed-income assets of both general and separate accounts. The industry's gross rate on total fixed-income assets was 4.64 percent in 2015 down slightly from 4.80 percent in 2014.

NET GAIN FROM OPERATIONS

Statutory accounting calculates net gain from (insurance) operations as gross income minus operating expenses, policyholder dividends, and federal income taxes (not including tax on capital gains, since capital gains are not included in gain from operations). Net gain from operations after federal income taxes increased 2.3 percent in 2015 to \$52 billion (Table 4.9). Net gains can be calculated separately for each major line of business. Net gains from annuities were \$25 billion compared with \$24 billion in net gains a year ago. The net gain from life insurance increased 18.1 percent to \$9 billion.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Net gain is calculated after dividends to policyholders and federal income taxes are deducted and before realized capital gains or (losses) are added. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in numbered footnotes. Data represent U.S. life insurers and fraternal benefit societies.

¹Beginning in 2001, excludes certain deposit-type funds from income due to codification, and includes supplementary contracts with life contingencies. Also excludes reserves for supplementary contracts without life contingencies and annuities certain, lottery payouts, structured settlements, and income payout options.

²Includes lines of business other than life (e.g. workers compensation, aviation insurance, etc.).

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in footnotes. Prior to 1947, the business of health insurance departments of life insurers was not included in this series. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

*Unusually large increase due to NAIC-mandated change in reporting method for group annuity considerations.

^Excludes certain deposit-type funds from income due to codification.

‡Includes fraternal benefit societies.

Beginning in 2000 represents gross investment income. Prior to 2000, figures are net of investment expenses.

²Beginning in 1975, includes commissions and expense allowance on reinsurance ceded. Beginning in 1992, includes amortization of the interest maintenance reserve.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Before 1940, some federal income taxes were deducted from net investment income; beginning with 1940, rates are calculated before deducting any federal income taxes. Beginning in 1994, rates include amortization of the interest maintenance reserve. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

‡ Includes fraternal benefit societies.

NA: Not available

Table 4.13

5 expenditures

Life insurance company expenditures include benefit payments and other contract payments, operating expenses, taxes, additions to reserves, and investment expenses. Contract payments accounted for 57 percent of expenditures at \$572 billion in 2015 (Table 5.1, Figure 5.1). Additions to reserves were \$270 billion for the second-largest category at 27 percent.

Operating expenses comprised 12 percent of 2015 total expenditures, taxes claimed 2.4 percent and investment expenses claimed 1 percent. Each expenditure category is detailed in this chapter, with the exception of reserves, which are discussed in Chapter 3.

CONTRACT PAYMENTS From Life Insurance Policies

Several factors affect the pattern of life insurance benefit payments. Primary among them are changes in the death rate of policyholders and the growth in group life insurance and other term insurance policies that do not incorporate a cash value.

These payments have increased steadily for many years, reflecting greater use of life insurance not only to provide funds for the family whose breadwinner dies, but also for family financial needs during the policyholder's lifetime.

Nationally, increasing life insurance ownership has been the main reason for the almost uninterrupted rise in life insurance death payments over the years, despite a general decline in death rates among policyholders.

To Beneficiaries

During 2015, life insurers paid \$74 billion to beneficiaries of policyholders who died; a 9.5% increase from 2014 (Table 5.2). Of this total, individual life insurance policies accounted for two-thirds and provided \$52 billion (70%). Group life insurance payments to beneficiaries ranked second at \$22 billion, or 29 percent of total death payments. Benefits paid under short-term individual and group credit life insurance policies (on loans of 10 years' or less duration) totaled \$294 million in 2015.

To Policyholders

Although the basic purpose of life insurance is to protect against the economic risks of death, it can also generate value for the individual policyholder. Cash surrender values paid on life insurance policies terminated voluntarily during 2015 increased by 3.8 percent to \$29 billion from a year earlier (Table 5.2).

Policyholder dividends represent the return of part of the payments that policyholders made on policies sold on a participating basis, and reflect the portion not needed by the company after payment of claims, additions to reserves, and administrative expenses. Dividends accounted for \$15 billion, or 16 percent of payments from life insurance policies in 2015.

Endowment insurance guarantees that the policy's face amount will be paid by the insurance company regardless of whether the insured dies during the policy's term, as long as premiums are paid as required. These policies specify a maturity date. Matured endowment payments totaled \$424 million in 2015.

Other payments, including disability payments and retained assets under life insurance policies, totaled \$677 million in 2015.

From Annuity Contracts

Annuity benefit payments increased by 5.3 percent to \$78 billion in 2015 (Table 5.3). Beginning in 2001, payments and withdrawals from deposit-type contracts are no longer reported as expenditures but directly as a deduction from reserves.

Sixty-two percent of the annuity benefit payments, or \$48 billion, was paid to individual annuity owners, while \$27 billion, or 35 percent, was paid to group annuity owners. The remainder was paid under supplementary contracts with life contingencies—an agreement between an insurer and a life insurance policyholder or beneficiary in which the beneficiary chooses to receive the policy's proceeds over a lifetime rather than in a lump sum.

Life insurers paid \$247 billion on voluntarily terminated annuities in 2015, \$3.3 billion in dividends to annuity owners, and small amounts of death benefits, disability benefits, and matured endowments.

From Health Insurance Policies

Health insurance has become a notable aspect of U.S. life insurers' services. Life insurance companies paid \$115 billion in health insurance benefits to Americans in 2015—\$75 billion under group contracts and \$40 billion under individual policies (Table 5.4). Life insurers' total health insurance benefit payments to Americans increased 1.5 percent from 2014.

These statistics do not include disability payments under life insurance policies, health insurance and accidental death and dismemberment payments by casualty and other health insurance companies, or administrativeservice-only arrangements.

OPERATING EXPENSES

Operating expenses of life insurance companies include commissions to agents and home- and field-office expenses. In 2015, agent commissions comprised 6 percent of expenditures at \$56 billion (Table 5.1). Homeand field-office expenses were \$62 billion, or 6.2 percent of total expenditures.

Of total office expenses, \$38 billion, or 62 percent, was in salaries and payments to employee and agent benefit plans (Table 5.5). In 2015, life insurers also spent \$7 billion on office equipment and supplies, \$2 billion on office rent, \$3 billion on fees associated with policy issuance and claim settlement, \$2 billion on advertising, and \$1 billion on travel.

TAXES

Life insurance companies incurred \$24 billion in taxes to federal, state, and local governments in 2015, 5 percent more than in 2014 (Table 5.6). Fifty-six percent of these taxes were income taxes at \$14 billion. Significant year-to-year variation in federal income taxes is largely due to changes in capital gain/loss obligations.

Another large tax obligation of life insurers' is payment of taxes on premiums that companies collect in each state. In 2015, U.S. life insurers incurred \$5 billion in state taxes on premiums collected from life, health, and annuity business.

As employers of over one-third of a million home-office personnel, U.S. life insurers also incurred \$2 billion in Social Security taxes in 2015. This figure does not include Social Security taxes paid by employees or selfemployed agents.

Miscellaneous taxes, licenses, and fees accounted for \$3.6 billion in 2015. These taxes do not include amounts associated with investment management.

INVESTMENT EXPENSES

Expenses, fees, and taxes associated with investment management totaled \$12.5 billion in 2015 (Table 5.7). Salaries and welfare expenses is the largest category at about \$2.6 billion followed by interest expenses at \$2 billion.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Figures exclude policy dividends. 1994-96 data have been revised to reflect the addition of life insurers that sell accident and health insurance. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies. ‡Includes fraternal benefit societies.

Reinsurance is a risk management tool used by insurers to spread risk and manage capital. The insurer transfers some or all of an insurance risk to another insurer. The insurer transferring the risk is called the "ceding insurer". The insurer accepting the risk is called the "assuming insurer" or "reinsurer". For life insurers, the risk transferred may be mortality, longevity or morbidity risk, surrender or expense risk, investment risk, or a combination of these risks.

Reinsurance has made possible the protection of a wider array of individuals and groups than would otherwise be feasible. An insurer who is approached by an applicant who presents an unusual risk—or who needs an amount of life insurance policy that is larger than the insurer's retention limit (the amount of risk an insurer has determined it can judiciously retain)—may still be able to offer the policy to the consumer if part of the risk is transferred to a reinsurer. A ceding insurer also uses reinsurance to limit its risk on a group of policies to avoid fluctuations in claim levels or to lower the risk of claims involving multiple deaths from single events.

Virtually all life insurers buy reinsurance to improve their risk profile. In 2015, 90 percent of life insurers with life premiums ceded at least some of those premiums as reinsurance. Among insurers with accident and health premiums, 85 percent ceded accident and health premiums as reinsurance. Forty six percent of insurers doing annuity business in 2015 ceded annuity considerations, excluding deposit-type funds. The Society of Actuaries annually publishes more detailed data on the life reinsurance marketplace in the *Reinsurance News*.

ALLOCATING RISK

In order for families to have peace of mind and for economies to thrive, there must be a mechanism to deal with large financial risk. Life insurers provide that financial security. Reinsurance spreads the risk of loss between two insurance companies. The risk can be spread even further if the ceding insurer uses more than one reinsurer, or the reinsurer in turn transfers some of that risk to another reinsurer, or retrocessionaire.

In the most basic reinsurance arrangement, a single insurer issuing policies to the public cedes business to a single reinsurer, usually an independent firm operating in the open marketplace. Insurers sometimes cede business to affiliates to aggregate similar risks in one entity for efficient risk management. Insurance groups also use captive reinsurers to reinsure risks exclusively from affiliated companies to access capital markets.

When reinsurance exists, the ceding insurer transferring the risk retains its financial relationship with, and legal obligation to pay claims to, the policyholder. The policyholder will not even be aware that part of the risk in their policy is covered by a reinsurer. The reinsurer indemnifies, or reimburses, the ceding insurer for losses incurred on the reinsured policies.

Reinsurance is now a global business. Of the \$189 billion total reinsurance premiums paid by U.S. life insurers in 2015, 87 percent was paid to reinsurers domiciled in the U.S. and 13 percent to reinsurers domiciled in other countries.

REINSURANCE RELATIONSHIP

Underwriting Strength

A closely related motivation for reinsurance is obtaining the reinsurer's underwriting assistance and proficiency. Reinsurers review and maintain policy and claim records on a large volume of risks from many ceding companies whose policyholders are diverse and geographically distributed. The risk pool from which they develop and provide underwriting knowledge is larger and wider than is normally available to a single primary insurer.

Underwriting is further strengthened when risk is spread to more than one reinsurer or retrocessionaire, because of the exposure to an even broader range of policies and claims. Confidence that underwriters are competently and professionally meeting its underwriting needs allows a ceding insurer to concentrate on other activities to expand its business.

Product Flexibility

Another reason to reinsure is the opportunity it gives a ceding insurer to exit from some product lines and enter others. If an insurer has issued policies in a particular product line that it wishes to discontinue, the insurer can reinsure most or all of the risk on those policies.

Conversely, if an insurer wants to enter a particular product line, reinsurers can help with product development and assume some of the product's risk. Later, as the primary insurer gains more confidence in its ability to underwrite and develop the product, the insurer might retain more of the risk on new business and recapture provisions in the reinsurance treaty might allow it to take back some of the risk the reinsurer assumed.

Capital Management

Reinsurance also helps a ceding insurer manage its capital efficiently. This is especially helpful to a life insurer issuing new policies because initial costs (expenses plus reserves) are often higher than premiums received. Sharing those initial costs and risks with a reinsurer helps the ceding insurer manage its cash flows.

TYPES OF REINSURANCE

Various reinsurance plans are available based on ceding companies' needs and their reasons for reinsuring. Plans can be broadly classified as either proportional reinsurance, specifying in advance the amounts or percentages of risk for which the reinsurer is liable, or nonproportional, specifying instead the loss limits, time limits, or conditions beyond which a reinsurer will reimburse some or all of the ceding insurer's benefit payments.

Proportional Reinsurance

Specified amounts or percentages are shared between ceding companies and reinsurers in proportional reinsurance. Excess of retention allocates risk by amount. The ceding insurer establishes a dollar amount beyond which it is unwilling to retain risk, and the reinsurer assumes risk over this amount, up to the reinsurer's retention limit. In contrast, quota share allocates by percentage, where the ceding insurer and reinsurer establish the percentage of risk for which each will retain or assume responsibility.

Proportional plans, commonly used in life insurance include:

■ *Yearly renewable term (YRT)* In this type, mortality risk is the only risk transferred to the reinsurer. The reinsurance premium varies each year with the age of the insured. YRT reinsurance allows a ceding insurer to transfer mortality risk, but it leaves the insurer responsible for establishing reserves for the remainder of the policy benefits. Despite its name, YRT is not yearly renewable. The reinsurer may not terminate coverage until the original insurance policy terminates.

- Coinsurance The ceding insurer transfers a proportionate share of all the policy risks and cash flows. The reinsurer re-ceives its share of premiums, pays its share of benefits, sets up its share of reserves, and pays an allowance to the ceding insurer to cover its share of the costs of administering the policy.
- Modified coinsurance The reinsurer transfers its share of reserves back to the ceding insurer while the risk remains with the reinsurer. The ceding insurer, however, must pay interest to replace what the reinsurer would have earned had it retained its share of the reserve. This arrangement allows the ceding insurer to reduce potential credit risk and to retain control over investments. The latter is particularly important where the insurer is using a unique investment strategy.

Nonproportional reinsurance

Nonproportional plans can be used for all types of insurance. Common uses include:

- Stop loss The reinsurer remits some or all of a ceding company's aggregate claims above a predetermined dollar amount (the attachment point), or above a percentage of premiums during a specified period.
- *Excess of time* Most often used for disability or longterm care reinsurance, this type of plan specifies the time after which a reinsurer pays some or all of the claims.
- *Catastrophe* The reinsurer covers claims that exceed a specified amount or number of insureds due to a single event resulting in more than one loss, as in an accident or natural disaster.

7LIFE INSURANCE

People buy life insurance to protect their dependents against financial hardship when the insured person, the policyholder, dies. Many life insurance products also allow policyholders to accumulate savings that can be used in a time of financial need. Most American families depend on life insurance to provide this economic protection: 75 million American families depend on life insurers' products to protect their financial and retirement security.

Americans purchased \$2.9 trillion of new life insurance coverage in 2015, a 4 percent increase from 2014. By the end of 2015, total life insurance coverage in the United States was \$20.8 trillion, an increase of 3 percent from 2014 (Table 7.1).

Three types of life insurance policies predominate the market. *Individual insurance* is underwritten separately for each individual who seeks insurance protection. *Group insurance* is underwritten on a group as a whole, such as the employees of a company or the members of an organization. *Credit insurance* guarantees payment of some debt, such as a mortgage or other loan, in the event the insured person dies, and can be bought on either an individual or a group basis. Insurance on loans of 10 years' or less duration is classified as credit insurance in National Association of Insurance Commissioners accounts; insurance on longer loans is included in individual or group policy data in this chapter. Life insurance policies offered by fraternal benefit societies are considered individual insurance.

INDIVIDUAL LIFE INSURANCE

Individual life is the most widely used form of life insurance protection, accounting for 59 percent of all life insurance in force in the United States at year-end 2015 (Table 7.1). Typically purchased through life insurance agents, this insurance is issued under individual policies with face amounts as low as \$1,000, although larger minimum amounts are more typical in today's market. While individual life is principally used for family protection, it also is widely used for business purposes. A business may purchase life insurance to protect against the economic loss that would result from the death of the owner or a key employee.

Individual life insurance protection in the United States totaled \$12.3 trillion at the end of 2015 and has grown at an average annual rate of 2 percent since 2005, when \$10 trillion was in force (Table 7.1).

The average size of new individual life policies purchased has decreased since its peak in 2008 to \$160,000 in 2015 (Figure 7.2). The number of individual policies purchased totaled 10.3 million in 2015 (Table 7.1).

Individual life policies offer two basic types of protection: covering a specified term, or permanently covering one's whole life.

Types of Policies

Term Insurance

Term insurance policies provide life insurance coverage for a specified period, usually greater than one year. Term policies provide no further benefits when the term expires, and no buildup of cash value occurs. If this insurance is not renewed at the end of its term, coverage lapses and no payment would be made to the beneficiary in the event of death.

Of new individual life policies purchased in 2015, 38 percent, or 3.8 million, were term insurance, totaling \$1.1 trillion, or 69 percent, of the individual life face amount issued (Table 7.2). The most popular form of term insurance is level term, which offers a fixed premium.

Permanent Insurance

Unlike term insurance, permanent life (or whole life) insurance provides protection for as long as the insured lives. Permanent life policies also have a savings component, building cash value that can help families meet financial emergencies, pay for special goals, or provide income for retirement years.

There are four types of permanent life insurance policies: traditional whole life, universal life (UL), variable life (VL), and variable-universal life (VUL). The annual premium for traditional whole life policies remains constant throughout the life of the policy. In earlier years, the premium is higher than the actual cost of the insurance, but in later years it becomes substantially lower than the actual cost of protection. The excess amount of each premium in the early years is held in reserve as the policy's cash value. This cash value grows over time from investment earnings and future premium payments, providing funds for the cost of coverage as the insured grows older. If a policyholder decides to give up the insurance protection, he or she receives the cash value upon surrendering the policy, less any outstanding policy loans. Universal life allows varying premium payment amounts subject to a certain minimum and maximum. For variable life, the death benefit and cash value vary subject to the performance of a portfolio of investments chosen by the policyholder. VUL combines the flexible premium payment options of UL with the varied investment options of VL.

In 2015, direct purchases of permanent life constituted 62 percent of U.S. individual life insurance policies issued and 31 percent of the total face amount issued (Table 7.2).

Participating and Nonparticipating Insurance

Traditional whole life and term insurance policies can be purchased on a participating or nonparticipating basis. A participating policy allows the policyholder to share in the insurance company's surplus. With this type of life insurance, a policyholder receives annual dividends representing that portion of the premium not needed by the company for death payments to beneficiaries, additions to reserves, or administrative expenses. Nearly three-fourths of individual life policies' face amount purchased were nonparticipating at \$1.17 trillion (73%) in 2015 (Table 7.3).

Characteristics of Individual Policies Lapses and Surrenders

A policy lapses if its premium is not paid by the end of a specified time, often called the *grace period*. Policyholders have different reasons for terminating their policies, sometimes using cash values to address financial emergencies or achieve long-term goals. Rates of voluntary policy termination by policyholders vary considerably among life insurers. Each company's rate depends on many factors, including the types of policies written and the ratio of new policies to older ones in force with the company.

The voluntary termination rate of individual life insurance policies reached 5.4 percent by 2015 (Table 7.4). Of the individual life policies that have been voluntarily terminated, 18% were surrendered.

The life insurance business vigorously seeks to minimize the lapsing of policies. For example, agent training focuses on realistic identification of clients' life insurance needs, and careful analysis of the use of family income for protection. Since the voluntary termination rate is higher for policies on which loans are outstanding, companies urge that loans be used only in genuine financial emergencies, and that they be repaid promptly. Most insurers offer policyholders time after their policy is delivered to consider whether to keep the policy. These companies will refund the premium in full if, within the prescribed time, the policyholder decides not to keep his or her policy.

Some policies that lapse still have a cash value, entitling the policyholder to some form of payment under a cash surrender value *non-forfeiture option*. All coverage under the policy terminates at the time of the surrender.

Disability Provisions

Besides the benefit payable upon death of the insured, many life insurance policies or policy riders provide disability benefits to cover financial losses that result from a sickness or injury. The most common supplementary benefit is waiver of premium. Of individual life policies in force in 2015, 91 percent, or 32 million, allowed the premium to be waived during disability, representing \$3.7 trillion, or 99 percent, of the individual life face amount in force with disability provisions (Table 7.6).

GROUP LIFE INSURANCE

Group life insurance is a contract between an insurance company and some group to insure all of the group's members, usually under term coverage. Common examples are employer-provided life insurance and insurance offered through unions and professional associations. Employees or other group members receive certificates denoting their participation in the group coverage. In 2015, group insurance represented 44 percent of all life insurance policies in force (Table 7.1).

Group purchases increased 5 percent in 2015 to \$1.23 trillion. At the end of 2015, group life insurance provided \$8.4 trillion of protection, 2 percent more than a year earlier (Table 7.1).

Group insurance contracts can provide benefits beyond term insurance. Employees often can retain coverage after retirement by paying premiums directly to the insurer. Many policies also offer survivor benefits, usually continuing monthly payments to the spouse of an employee who dies before retirement; payments may extend for life or to the age at which Social Security retirement payments become available, but cease on remarriage. Contingent benefits to dependent children in the event of a spouse's death are available as well. The initial value of these survivor benefits can range from three to 10 times an employee's annual salary.

As with individual life policies, group policies can be purchased on either a participating or nonparticipating basis. Most group life policies are nonparticipating—95 percent of those purchased in 2015, at \$1.2 trillion (Table 7.3).

The voluntary termination rate of group life insurance policies increased to 5.9 percent from 5.6 percent a year earlier. The voluntary lapses in 2015 increased to 5.9 percent from 5.5 percent in 2014 (Table 7.4).

Group policies also provide disability benefits. Of group life policies in force in 2015, 93 percent, or 70 million, provided for waiver of premium, representing \$5.1 trillion, or 92 percent, of the group life face amount in force with disability provisions (Table 7.6).

CREDIT LIFE INSURANCE

Credit life insurance pays the balance on loans of 10 years' or less duration if the borrower dies before repaying the amount due. At year-end 2015, \$76 billion of credit life insurance was in force, down 5 percent from the previous year (Table 7.1).

Credit life, commonly part of consumer credit contracts, is term insurance, generally decreasing in amount as a loan is repaid. It protects the borrower's family, as well as the lender, against unpaid debt that may be left at death. Life insurers issue credit insurance through lenders such as banks, finance companies, credit unions, and retailers, who in turn make arrangements with borrowers.

As with other life policies, credit policies can be purchased on either a participating or nonparticipating basis. Of credit life policies purchased in 2015, 93 percent, or \$50 billion, were nonparticipating (Table 7.3).

POLICY CLAIMS RESISTED OR COMPROMISED

From time to time, life insurers find it necessary to delay or deny payment of claims due to material misrepresentation, suicide within the contestable period, or no proof of death, among other reasons. In 2015, \$346 million in new claims along with \$897 million in other claims were in dispute. Of this amount, \$207 million was paid in 2015 and \$414 million still resisted at the end of the year (Table 7.7).

Sources: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission; Spectator Year Book.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data; Data represent direct business for policies/certificates

and net business for face amounts. Beginning in 1959, data include Alaska and Hawaii. 1994-97 data for individual amount and group certificates were revised. Individual and group categories include credit life insurance on loans of more than 10 years' duration; credit category is limited to life insurance on loans of 10 years' or less duration. Totals represent all life insurance (net of reinsurance) on residents of the United States, whether issued by U.S. or foreign companies.

*Fewer than 500,000.

‡Includes fraternal benefit societies.

Includes group credit certificates.

8 annuities

Annuities are financial contracts that pay a steady stream of income for either a fixed period of time or for the lifetime of the annuity owner (the *annuitant*). Most pension and retirement plan assets held by life insurers are annuity contracts. Because they can guarantee a stream of income for life, annuities protect annuity owners against the possibility of outliving their financial resources.

Annuities are sold as either immediate annuities or deferred annuities. Immediate annuities begin making annuity payments immediately, while deferred annuities defer the onset of annuity payments until some later date (typically when the annuity owner retires). During the deferral or accumulation phase, the annuity owner makes premium payments into the annuity and the savings inside the annuity grows to maximize the later annuity payments back to the annuity owner.

Codification of annual statements, effective for 2001 filings, changed the way certain lines of business are categorized and reported. This is particularly true of annuities and deposit-type contracts (e.g., guaranteed interest contracts or GICs). Prior to 2001, deposit-type funds were included with annuities; now they are reported separately. As a result, annuity data prior to 2001 is not comparable with 2001 or later data.

During 2015, payments into annuities, known as considerations, decreased 8 percent to \$352 billion (Table 8.1), while annuity reserves increased 1 percent to \$3.41 trillion (Table 8.2).

Annuities provide a variety of features designed to meet different needs. Depending on risk tolerance, an annuitant can choose a *fixed annuity*, which provides stable returns, or a *variable annuity* which is backed by equity investments for potentially greater, but uncertain, returns. A joint and survivor annuity ensures an income stream as long as either spouse is alive. Under some options, payouts will continue to a designated beneficiary after the annuitant's death.

GROUP AND INDIVIDUAL ANNUITIES

Contributions to group annuities, which are sold through employer-sponsored retirement plans, increased to \$124 billion in 2015, 9 percent higher than in 2014 (Table 8.1). Reserves for this type of annuity accounted for nearly one-third of all annuity reserves by the end of 2015 (30%), or \$1 trillion (Table 8.2). Benefit payments to group annuitants increased to \$27 billion, up 6 percent from 2014 (Table 8.3).

Employer-sponsored retirement plans are divided between two types that differ according to their benefits structure. *Defined benefit plans* provide a specified monthly benefit during retirement. The benefit amount is usually based on an employee's salary and length of service. The employer funds such plans and bears the entire investment risk.

Profit-sharing, 401(k), 403(b), and 457 plans are *defined contribution plans*. Rather than specifying benefits and retirement income, this type of plan specifies contributions, usually as a fixed amount or a percentage

of income, where the employee bears the investment risk. The benefit received under defined contribution plans is determined by contributions, investment returns, and expenses. Annuitization of the balance at retirement is not mandatory, and lump sums have been the most popular distribution method.

A person can also buy an annuity directly from a life insurer. During 2015, Americans deposited \$209 billion in individual annuities, down 16 percent from 2014 (Table 8.1). Individual annuity owners received \$51 billion in benefit payments, leaving \$2.3 trillion in individual annuity reserves at year-end 2015 (Tables 8.2–8.3).

SUPPLEMENTARY CONTRACTS, ANNUITIES CERTAIN, AND OTHER ANNUITIES

A *supplementary contract* is an agreement between an insurer and a life insurance policyholder or beneficiary in which the beneficiary chooses to receive the policy's proceeds over a period of time instead of as a lump sum. If this period is the lifetime of the beneficiary, the contract is a supplementary contract with life contingencies, essentially a life annuity; if the payments continue for a specific period, the contract is called a supplementary contract without life contingencies, or an annuity certain.

During 2015, \$19 billion was deposited into supplementary contracts without life contingencies and annuities certain, 4 percent less than in 2014 (Table 8.1), and \$20 billion was paid to policyholders or beneficiaries (Table 8.3), leaving a total reserve of \$87 billion at the end of 2015 to back future claims (Table 8.2).

9 DISABILITY INCOME AND LONG-TERM CARE INSURANCE

Disability income insurance and long-term care insurance provide important financial protection for American families. Disability income insurance serves as paycheck protection for workers by replacing a portion of earnings if an insured employee is unable to work due to accident or illness. Long-term care insurance protects retirement savings and alleviates financial hardships that might otherwise impoverish a family paying for long-term care needs.

DISABILITY INCOME INSURANCE

Prolonged unemployment due to disability can jeopardize a worker's lifestyle and savings for retirement. The risk of becoming disabled is significant: According to the US Census Bureau, nearly seventeen percent of working-age Americans reported a disability in 2010. Of those with a disability, 17.5% were employed compared to the 65% of working-age Americans with no disability in 2015.

Disability income policies commonly provide 50 to 70 percent of an insured's pre-disability income while an insured employee is unable to work due to accident or illness. In addition to choices in benefits and elimination periods, some policies provide comprehensive protection while others define disability more narrowly, covering only accidental injury or illness. Policies may also include coverage for partial disability, residual benefits, costof-living adjustments, survivor benefits, and pension supplements. Many also include benefits to help people return to work following a disability. Often insurers will reduce benefits if an employee is receiving disability payments from other sources. Workers compensation pays cash benefits to workers disabled by an on-the-job accident or illness. Because workers compensation is a state-administered program, rules governing payment, benefit levels, and length of coverage vary considerably from state to state. Workers whose illness or injury is not caused on the job may be eligible for paid sick leave or state-mandated shortterm disability benefits. The federal disability insurance program under the Social Security Administration, known as SSDI, provides cash assistance to people with longterm disabilities who are unable to work. SSDI's modest income support is limited to those who meet a very strict test of work disability.

Both individual and group disability income insurance pay benefits as an indemnity—usually weekly or monthly. Disability income insurance may be offered by employers, purchased individually, or used to protect a business. Employers may offer insurance for either shortor long-term disabilities, or provide comprehensive disability protection. Some policies reimburse businesses for expenses associated with disability. Each of these types of policies is described below.

Individual Disability Income Insurance

Individual disability income policies are sold to the self-employed, professionals, and to a market of diverse needs. Some people prefer individual coverage rather than group coverage because the former is portable. Workers, whose employers provide only basic coverage, may buy additional disability insurance through an individual policy. Companies also purchase disability income insurance to protect or dispose of the business if a key employee or the owner becomes disabled.

Personal Coverage

Most people buy individual disability income insurance to protect against long-term disability. Individual policies typically cover both occupational and non-occupational accidents and sickness for a selected term. Individual long-term disability benefits are not subject to income tax if the policyholder pays the premiums in full. Since benefits are designed to replace earned income, most people do not purchase coverage beyond their working years.

Disability income insurance for individuals is offered primarily in two forms. Non-cancellable policies give policyholders the right to continue coverage as long as premiums are paid on time. The insurer cannot change the premiums or benefits prior to an age stated in the policy, usually 65. Insurers also offer guaranteed renewable policies that can be automatically renewed with the same benefits. The premium for this type of policy may be increased only if it is changed for the entire class of policyholders.

Business Coverage

A small proportion of individual disability income policies is bought by business owners.

Key-person disability insurance replaces income lost when an essential employee or owner is unable to work. Some policies pay benefits directly to the insured as salary continuation, while others pay benefits to the business to protect the company from sudden loss of income, credit, or profits. Another form of protection is disability buy-sell insurance, which pays benefits to the business to enable owners to purchase interest in the company from a disabled partner or owner.

Businesses frequently obtain a disability income policy to cover business overhead expenses, including wages, in case the owner becomes disabled. A business also can purchase reducing term disability insurance to help cover loan repayments, purchase agreements, or salary contracts if the owner or key employee becomes disabled. This type of insurance is in effect for the length of the loan or other commitment, and coverage is reduced as the amount due is paid off.

Group Disability Income Insurance

Many disability income policies are offered as part of an employee group benefit package. Employers purchase disability coverage from an insurance company or self-insure the benefits. According to the U.S. Bureau of Labor Statistics, 39 percent of all workers in private industry were participating in short-term disability income insurance in 2015; 32 percent were participating in long-term disability income insurance.

Short-Term Coverage

Short-term coverage helps protect against loss of income for employees unable to work because of a temporary illness or injury. Such sickness and accident plans replace a portion of earnings for a fixed period of time. Benefits commonly last 24 weeks, although coverage can range from 13 to 104 weeks. Short-term disability income insurance also can offer protection during the waiting period before a worker becomes eligible for SSDI or long-term disability coverage.

Disability income insurance pays short-term benefits as either a percentage of employee earnings or a flat dollar amount. The most common plans pay a percentage of earnings, typically replacing from one-half to two-thirds of pre-disability income. A majority of these plans places a dollar limit on the weekly or monthly benefit. Benefits also can vary depending on length of service and other factors. Most short-term coverage requires a waiting period, usually one to seven days, before benefits begin.

Long-Term Coverage

Long-term disability income plans cover both occupational and non-occupational sickness and accidents. Benefits typically start when short-term benefits are exhausted after a waiting period of three to six months following the onset of disability. These policies generally provide benefits for persons up to age 65 or Social Security retirement age. In certain cases, long-term coverage may provide benefits for life.

Almost all group long-term disability plans coordinate with Social Security and typically require claimants to apply for SSDI benefits. Disability insurers frequently offset benefits payable under private insurance dollarfor-dollar with SSDI payments. Benefits also are subject to income tax if the employer pays the premiums; they are not taxable if the employee pays the premiums.

LONG-TERM CARE INSURANCE

Long-term care insurance pays for services to help policyholders who are unable to perform certain activities of daily living without assistance—such as bathing, eating, dressing, using the toilet, and transferring from bed to chair. This insurance also pays benefits when the insured person requires supervision due to a cognitive impairment such as Alzheimer's disease.

Since the likelihood of chronic illness or disability increases with age, long-term care insurance traditionally has been sold to older Americans. However, the younger the purchaser, the lower the premiums, and within the last 10 years, group insurance plans have begun covering working-age people. In 2015, life insurers collected \$11.3 billion in long-term care insurance premiums (NAIC data).

The market for private long-term care insurance is closely linked to federal and state government policy. Public funding for long-term care comes from two main sources. Medicaid—a joint federal-state program that targets low income people—is the primary government funding source for long-term care. To qualify, beneficiaries must deplete most of their assets and meet a strict income test. Medicare primarily pays for medically related recovery and rehabilitation services at home or in a nursing home.

There are two basic types of long-term care insurance: individual insurance and group. The latter is employersponsored or offered through an association. These products are considered long-term if the benefit is one year or longer. Long-term care protection also is available through life insurance policies that accelerate the death benefits for individuals with chronic conditions.

Long-term care insurance has evolved in response to changes in the long-term care delivery system and consumer preferences. When first sold in 1972, policies covered only skilled care in a nursing home after a period of hospitalization. Since the mid-1980s, consumers have demanded greater choice and more help in maintaining their quality of life. Insurers now offer policies covering services that promote independent living including personal care, assisted living, care management, support for family caregivers, home modifications, homemaker services, and hospice, in addition to institutional care.

Coverage for long-term care also varies by how benefits are paid. Traditional indemnity policies offer a fixed daily payment to eligible beneficiaries, usually in a nursing home. Other policies reimburse the insured for expenses, up to the policy's daily maximum—for example, \$150 per day for nursing home care or \$100 per day for home care. Most reimbursement policies now pool benefit dollars under more flexible spending limits, so that a beneficiary can receive payment for either nursing-home care or home- and community-based care. A third payment method uses a disability model, providing a cash benefit when eligibility requirements are met, regardless of whether the insured actually uses any long-term care services.

Individual Long-Term Care Coverage

Individual long-term care insurance can be tailored to meet financial and lifestyle goals. The policyholder selects the length of benefit term (one to five years or a lifetime) and other options such as the amount of maximum daily benefit, length of elimination period, level of care, inflation protection, and nonforfeiture benefits.

Most individual long-term care insurance is offered as a guaranteed renewable policy—renewable with the same benefits as long as premiums are paid on time. Premiums cannot be increased unless they are changed for the entire class of policyholders. Since long-term care policies do not build cash value, buying a nonforfeiture benefit or selecting a policy with contingent nonforfeiture protection allows the insured to receive benefits upon surrendering the policy. Some policies offer riders that return premiums upon the death of the insured.

Group Long-Term Care Coverage

Businesses, some state governments, unions, and fraternal and other associations such as AARP sponsor group long-term care insurance. Groups can either purchase long-term care coverage from an insurance company or self-insure. Under self-insured plans, the members of the group, usually employees, assume all risks and expenses of providing long-term care coverage. Most employers offering this benefit purchase group insurance coverage. Group long-term care insurance typically is offered as a voluntary benefit for which the employee pays some or all of the premium. Long-term care insurance purchased through the workplace also is portable: Employees can retain coverage in retirement or if they change employers by paying the entire premium directly to the insurer.

According to the U.S. Bureau of Labor Statistics, 17 percent of all workers in private industry had access to long-term care insurance at work in 2015

ACCELERATED BENEFITS

To help pay long-term care costs, certain life insurance policies allow the policyholder to access benefits prior to death. Circumstances that can trigger these accelerated benefits include diagnosis of a terminal illness or a medical condition that would drastically shorten the policyholder's life span, the need for long-term care, or permanent confinement in a nursing home. Accelerated benefit provisions may be integrated in the policy or more typically attached as a rider.

10 in the states

The life insurance industry is integral to the economies of all 50 states and the District of Columbia. In 2015, 798 life insurers were domiciled in the United States, and another 16 were domiciled in U.S. territories (Table 10.1). The companies' investments contribute to state economies as Americans and their families achieve financial security through life insurance products.

Billions of dollars of life insurance coverage is purchased in each state every year, ranging from \$372 billion in California to \$4 billion in Wyoming in 2015 (Table 10.2). Total life insurance in force ranged from \$3.6 trillion in California to \$49 billion in Wyoming (Table 10.3).

Payments from life insurers are a mainstay of financial security for residents in every state. Death payments under life insurance policies were greatest in California (\$8.6 billion) and Texas (\$6.3 billion) during 2015 (Table 10.4). Life insurance beneficiaries in 11 other states received payments totaling over \$2 billion, and 16 states had death payments between \$1 billion and \$2 billion. Table 10.5 breaks down death payments among individual, group, and credit policies.

Annuity payments are another source of financial security provided by life insurers nationwide. In 2015, payments from annuities totaled \$8 billion in California followed by \$6.4 billion in New York (Table 10.4). Residents of 23 other states received annuity payments totaling more than \$1 billion.

Table 10.6 reports the distribution of premium receipts by state in 2015 across the various product lines offered by life insurers—life insurance, annuities, health insurance, and deposit-type funds. The greatest premium amounts for life insurance, health insurance, and annuities were collected in California (\$64 billion) and New York (\$48 billion).

Life insurers are a significant source of investment capital in each state, particularly through real estate loans. U.S. life insurers held \$420 billion in domestic mortgages in 2015. Mortgage holdings ranged from \$82 million in Vermont to \$89 billion in California (Table 10.7). Life insurers also directly own real estate across the country—\$44 billion worth in 2015 (Table 10.8). California and Florida had the most real estate owned by life insurers, with \$11 billion and \$3.3 billion, respectively. Table 10.1

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Codification effective with 2001 Annual Statement filings changed the reporting of certain lines of business, particularly deposit-type contracts, as explained in numbered footnotes. Data represent direct business of U.S. life insurers and fraternal benefit societies.

'Excludes payments from deposit-type contracts due to codification.

² Includes matured endowments, disability payments, and payments on guaranteed interest contracts (GICs).

³Includes Puerto Rico, American Samoa, Guam, U.S. Virgin Islands, Canada, N. Mariana Islands and other aggregates.

11 INDUSTRY RANKINGS

The U.S. life insurance industry in 2015 is made up of 814 companies with sales and operations across the country. Many of these companies are stand-alone entities, with no life insurer affiliate or subsidiary operating in the United States. Others are organized into groups or fleets of affiliates and subsidiaries. This chapter presents rankings of the 25 largest life insurance groups (counting stand-alone companies as a group of one) based on assets, premiums and annuity considerations, and life insurance coverage.

12 mortality and life expectancy

U.S. mortality rates and life expectancies have improved dramatically over the long term. The aggregate, age-adjusted death rate (per 1,000 population) has fallen from 17.9 in 1940 to 7.2 in 2014 (Table 12.1). The death rate among males dropped from 19.8 to 8.6 over this period, and among females, from 16 to 6.2.

Life expectancy at age 25 is currently 52.6 years for males and 57 years for females (Table 12.2). A man who retired in 2014 at age 65 could expect to live 18 years more on average, while a 65-year-old woman could expect to live another 20.5 years. Examining trend data for life expectancy over the past century yields startling contrasts. A 25-year-old during 1900–02 could expect to live 39.1 years more vs. 54.8 additional years for a 25-year-old in 2014.

Because of increased longevity, the last seventhirteen years shown in Table 12.2 have been extended to include life expectancy for men and women at age 100. This is consistent with the 2001 Commissioners Standard Ordinary (CSO) Mortality Table. The 2001 CSO mortality table was introduced by the Society of Actuaries and adopted by the National Association of Insurance Commissioners for life insurers to use in underwriting insurance (Table 12.3). It is the prevailing mortality table and has been adopted by most states.

	Age-adjusted rate per 1,000 population

Death Rates in the United States

Source: U.S. Department of Health and Human Services' National Center for Health Statistics, National Vital Statistics Reports.

¹Based on population estimates from the 2000 census, which were modified for consistency with Office of Management and Budget racial categories as of 1977. All death rates have been revised, and may differ from previously published rates that were based on 1990 population estimates.

Source: U.S. Department of Health and Human Services' National Center for Health Statistics, National Vital Statistics Reports.

Notes: Alaska and Hawaii are included as of 1959. For decennial periods prior to 1929-31, data represent death registration states only: 1900-02 and 1909-11, 10 states and the District of Columbia; 1919-21, 34 states and the District of Columbia. Beginning with 1970, data exclude deaths of nonresidents of the United States.

Source: National Association of Insurance Commissioners.

Projected to 2015.

²Mortality rates are conservative in relation to the actual and projected experience on which they are based.

- For Life Insurance, conservative means higher rates of death and lower life expectancy.

- For annuities, conservative means lower rates of death and higer life expectancy.

APPENDIX

GLOSSARY OF INSURANCE-RELATED TERMS

Α

Accelerated death benefit Benefit paid, under clearly defined health-related circumstances, to a policyholder prior to his or her death. Accelerated death benefits are also known as *living benefits*.

Accidental death benefit A provision added to a life insurance policy for payment of an additional benefit if death is caused by an accident. Also known as *double indemnity*.

Actuary A person professionally trained in the technical aspects of insurance and related fields, particularly in the mathematics of insurance such as the calculation of premiums, reserves, and other values.

Adjustable life insurance A type of life insurance that allows the policyholder to change the plan of insurance, raise or lower the policy's face amount, increase or decrease the premium, and lengthen or shorten the protection period.

Adjuster A person, usually employed by a property/casualty insurer, who evaluates losses and settles claims. Independent adjusters are independent contractors who adjust claims for the insurance companies.

Agent A representative of an insurance company who is authorized to sell and service insurance contracts. Life insurance agents are also known as *life underwriters or producers*.

Annuitant The person whose life expectancy is used to determine the payout of an annuity.

Annuity A financial contract issued by a life insurance company that offers tax-deferred savings and a choice of payout options to meet an owner's needs in retirement: income for life, income for a certain period of time, or a lump sum.

Annuity certain A contract that provides an income for a specified number of years, regardless of life or death.

Annuity consideration The payment, or one of regular periodic payments, that a policyholder makes to an annuity.

Application A statement of information made by a prospective purchaser that helps the insurer assess the acceptability of risk.

Assets Property owned by an insurance company—including stocks, bonds and real estate. Insurance accounting focuses on solvency and the ability to pay claims, therefore a conservative valuation of assets is required. This prohibits companies from listing assets on their balance sheets when values are uncertain.

Asset valuation reserve (AVR) A reserve that makes provisions for credit-related losses on fixedincome assets (default component) as well as all types of equity investments (equity component).

Assignment The legal transfer of one person's interest in an insurance policy to another person.

Assume To accept the risk of potential loss from another insurer.

Assumption reinsurance A reinsurance agreement in which one company permanently transfers full responsibility for a block of policies to another company. After the transfer, the ceding company is no longer a party to the insurance agreement.

Automatic premium loan A loan provision in a life insurance policy allowing any premium not paid by the end of the grace period (usually 30 or 31 days) to be paid automatically through a policy loan if cash value is sufficient.

Balance sheet Information on a company's financial condition at a single point in time showing assets, investments, and liabilities. The balance sheet also reveals a company's equity, known as policyholder surplus. Changes in the surplus are one indicator of a company's financial standing.

Bank holding company A company that owns or controls one or more banks. The Federal Reserve regulates and supervises bank holding company activities such as approving mergers and acquisitions. The authority of the Reserve applies even though a bank owned by a holding company may be under the primary supervision of the Comptroller of the Currency or the FDIC.

Beneficiary The person or financial entity (for instance, a trust fund) named in a life insurance policy or annuity contract as the recipient of policy proceeds in the event of the policyholder's death.

Benefit The amount payable by the insurance company to a claimant, assignee, or beneficiary when the insured suffers a loss covered by the policy.

Bond A security obligating the issuer to pay interest at specified intervals and to repay the principal at maturity. Bonds are a form of suretyship: Various types guarantee a payment or reimbursement for financial losses resulting from dishonesty, failure to perform, and other failures.

Bond rating An evaluation of a bond's financial strength by an established rating agency such as Standard & Poor's or Moody's Investor Services.

Broker A sales and service representative who handles insurance for clients and generally sells insurance of various kinds from one company or several.

Business disability insurance Disability insurance purchased by a business on a member of a firm. This insurance is often used to protect business partners against loss caused by a partner's disability and to reimburse corporations for loss caused by the disability of a key employee.

Business life insurance Insurance purchased by a business on the life of a member of the firm. This insurance protects surviving business partners against loss caused by the death of a partner and reimburses corporations for loss caused by the death of a key employee.

Capacity The amount of insurance available to meet demand. Availability depends on the industry's capacity for risk. For an individual insurer, it is the maximum amount of risk it can underwrite based on its financial condition. An insurer's capital relative to its exposure to loss is an important measure of its solvency.

Capital stock The initial book value of stock sold by a company to start its operations.

Captive agent A person who represents only one insurance company and is restricted by agreement from submitting business to any other company unless rejected first by the captive agent's company.

Cash balance plan A defined benefit plan that strongly resembles a defined contribution plan. Benefits accrue through employer contributions to employee accounts and interest credits to balances in those accounts. The accounts serve as bookkeeping devices to track benefit accruals.

Cash value The amount available in cash upon surrender of a permanent life insurance policy. Also known as cash surrender value.

Cede To transfer the risk of potential loss to another insurer.

С

Certificate A statement issued to persons insured under a group policy that defines the essential provisions of their coverage.

Claim Notification to an insurance company that payment of an amount is due under the terms of a policy.

COBRA (Consolidated Omnibus Budget Reconciliation Act) A federal law under which group health plans sponsored by employers with twenty or more employees must offer continuation of insurance coverage to employees and their dependents after they leave their employment. Under COBRA, coverage can be continued for up to 18 months; the employee pays the entire premium.

Codification A process undertaken by NAIC to redefine life company statutory accounting to ensure consistency in how companies present their accounts in their annual statements. This process culminated in the 2001 annual statements, the structure of which was noticeably different from the previous years.

Convertible term insurance Term insurance that can be exchanged, at the option of the policyholder and without evidence of insurability, for another plan of insurance.

Credit disability insurance Disability insurance issued through a lender or lending agency to cover payment of a loan, an installment purchase, or other obligation in case of disability.

Credit life insurance Term life insurance issued through a lender or lending agency to cover payment of a loan, an installment purchase, or other obligation in case of death.

Declination Rejection of an application for insurance coverage by an insurance company, usually due to the applicant's health or occupation.

Deductible The amount of loss paid by the policyholder. Either a specified dollar amount, a percentage of the claim amount, or a specified amount of time that must elapse before benefits are paid. The larger the deductible, the lower the premium charged for the same coverage.

Deferred annuity A contract in which annuity payouts begin at a future date.

Deferred group annuity A type of group annuity providing for the purchase each year of a paidup deferred annuity for each group member. The total amount received by a member at retirement is the sum of these deferred annuities.

Defined benefit plan A pension plan that specifies the benefits an employee will receive after retirement. Benefits typically are based on length of service and salary, and are usually funded by the employer on behalf of each plan participant.

Defined contribution plan A pension plan that specifies the contributions made by employees, and in many cases the employer, on behalf of each plan participant. These funds accumulate for each participant until retirement, when they are distributed as a lump sum or monthly annuity. Benefits are based on the amount of contributions plus earnings.

Deposit administration group annuity A type of group annuity that allows contributions to accumulate in an undivided fund, out of which annuities are purchased as each member of the group retires.

Deposit term insurance A form of term insurance in which the first-year premium is larger than subsequent premiums. A partial endowment typically is paid at the end of the term period. In many cases, the partial endowment can be applied toward the purchase of a new term or whole life policy.

D

Deposit-type contracts Contracts that do not include mortality or morbidity risks.

Disability A physical or mental condition that makes an insured person incapable of working.

Disability benefit The benefit paid under a disability income insurance policy; also a feature added to some life insurance policies providing for waiver of premium, and sometimes payment of monthly income, if the policyholder becomes totally and permanently disabled.

Disability income insurance Insurance that provides periodic payments, or in some cases a lump-sum payment, based on the insured's income replacement needs, when the insured is unable to work due to illness or injury.

Dividend An amount of money returned to the holder of a participating life insurance policy. The money results from actual mortality, interest, and expenses that were more favorable than expected when the premiums were set. The amount of any dividend is set by the insurer based on the insurer's standards.

Dividend addition An amount of paid-up insurance purchased with a policy dividend and added to the policy's face amount.

E Earned premium The portion of premium that applies to the expired part of the policy period. Insurance premiums are payable in advance but the insurance company does not fully earn them until the policy period expires.

Endowment Life insurance payable to the policyholder on the policy's maturity date, or to a beneficiary if the insured dies prior to that date.

Evidence of insurability The common requirement by life insurance companies that potential policyholders undergo a physical examination or medical tests, such as blood pressure or cholesterol screening, before the applicant can purchase an individual life insurance policy.

Extended term insurance A form of insurance available as a non-forfeiture option providing the original amount of insurance for a limited time.

Extra risk A person possessing a greater-than-average likelihood of loss.

F

Face amount The amount stated on the face of a life insurance policy that will be paid upon death or policy maturity. The amount excludes dividend additions or additional amounts payable under accidental death or other special provisions.

Family policy A life insurance policy providing insurance on all or several family members in one contract. It generally provides whole life insurance on the principal breadwinner and small amounts of term insurance on the spouse and children, including those born after the policy is issued.

Fiduciary A person or organization authorized to control or manage pension assets to administer a pension plan. Fiduciaries are legally obligated to discharge their duties solely in the interest of plan participants and beneficiaries, and are accountable for any actions that may be construed by courts as breaching that trust.

Fixed annuity A deferred annuity contract in which the life insurance company credits a fixed rate of return on premiums paid or an immediate annuity in which the periodic amount is fixed.

Flexible premium policy or annuity A life insurance policy or annuity contract that allows the amount and frequency of premium payments to be varied.

401(k) plan An employment-based retirement savings plan that allows employees to make taxdeferred contributions from current earnings.

403(b) plan A retirement savings plan, similar to a 401(k), for employees of charitable and educational organizations.

457 plan A retirement savings plan, similar to a 401(k), for employees of state and municipal governments.

Fraternal life insurance Life insurance provided by fraternal orders or societies to their members.

Fraud Intentional lying or concealment by policyholders to obtain payment of an insurance claim that would otherwise not be paid, or lying or misrepresentation by the insurance company managers, employees, agents, and brokers for financial gain.

General account An undivided account in which life insurers record all incoming funds. A general account is usually an insurer's largest, although separate accounts can also be used to fund specific liabilities as well.

Grace period A period of usually a number of days following each insurance premium due date except the first, during which an overdue premium may be paid and the policy be maintained. All policy provisions remain in force during this period.

Group annuity A pension plan providing annuities at retirement to a group of people under a master contract, usually issued to an employer for the benefit of employees. Each group member holds a certificate as evidence of his or her annuity.

Group life insurance Life insurance on a group of people, usually issued to an employer for the benefit of employees. Each group member holds a certificate as evidence of his or her insurance.

Guaranteed interest contract (GIC) A contract offered by an insurance company guaranteeing a rate of return on assets for a fixed period, and payment of principal and accumulated interest at the end of the period. GICs sometimes are used to fund the fixed-income option in defined contribution plans, such as 401(k)s.

G

Immediate annuity An annuity contract in which periodic payments begin immediately or within one year of the policy's issue.

Indemnity reinsurance A form of reinsurance in which the risk is passed to a reinsurer, which reimburses the ceding company for covered losses. The ceding company retains its liability to and contractual relationship with the insured.

Individual life insurance Paid by an individual and is payable upon death. Premiums can be paid annually, semiannually, quarterly, or monthly.

Individual policy pension trust A type of pension plan frequently used for small groups and administered by trustees authorized to purchase individual level-premium policies or annuity contracts for each plan member. The policies usually provide both life insurance and retirement benefits.

Individual retirement account (IRA) An account to which a person can make annual contributions of earnings up to a specified dollar limit. These contributions are tax-deductible for workers who are not covered by an employment-based retirement plan, regardless of income, or whose income does not exceed certain taxable income levels.

Insolvency Insurer's legal inability to pay its future policyholder obligations. Insurance insolvency standards and the regulatory actions taken vary from state to state. Typically, the first indications of an insurer's financial stress are its inability to pass the financial tests regulators routinely administer.

Institutional investor An organization such as a bank or insurance company that buys and sells large quantities of securities.

Insurable Interest This doctrine requires that a person or company be in a position to suffer monetary loss before they can purchase life insurance on another person's life, or property insurance on another's property. The interest must exist at the time the insurance contract is issued.

Insurable risk Risks for which it is relatively easy to get insurance. Such risks meet certain criteria including being definable, accidental in nature, and part of a group of similar risks large enough to make losses predictable. Such conditions make it possible for an insurer to offer insurance at a reasonable rate.

Insurance A system to make coverage of large financial losses affordable by pooling the risks of many individuals or business entities and transferring them to an insurance company in return for a premium.

Insurance examiner The state insurance department representative assigned to conduct the official audit and examination of an insurance company's operations.

Insured The person on whose life an insurance policy is issued. Also known as insured life.

Interest maintenance reserve (IMR) A reserve that captures all realized, interest-related capital gains and losses on fixed-income assets. These gains and losses are amortized into income over the remaining life of the investment sold.

- J Joint and survivor annuity An annuity in which payments are made to the owner for life and, after the owner's death, to the designated beneficiary for life.
- **K Keogh (H.R. 10) account** A retirement savings account to which a self-employed person can make annual tax-deductible contributions, subject to limitations.
- L Lapsed policy An insurance policy terminated at the end of the grace period because of nonpayment of premiums. See non-forfeiture value.

Legal reserve life insurance company A life insurer operating under state insurance laws that specify the minimum basis for reserves that the company must maintain on its policies.

Level premium life insurance Life insurance for which the premium remains the same from year to year. The premium is more than the actual cost of protection during earlier years of the policy and less than the actual cost in later years. The initial overpayments build a reserve which, together with interest to be earned, balances the underpayments of later years.

Life annuity An annuity contract that provides periodic income payments for life.

Life expectancy The average years of life remaining for a group of persons of a given age, according to a mortality table.

Life insurance in force The sum of face amounts and dividend additions of life insurance policies outstanding at a given time. Additional amounts payable under accidental death or other special provisions are excluded.

Limited payment life insurance Whole life insurance on which premiums are payable for a specified number of years, or until death if it occurs before the end of the specified period.

Long-term care insurance Insurance that provides financial protection for persons who become unable to care for themselves because of chronic illness, disability, or cognitive impairment such as Alzheimer's disease.

Lump-sum distribution The non-periodic withdrawal of money invested in an annuity.

M Malpractice insurance Professional liability coverage for physicians, lawyers, and other specialists against lawsuits alleging negligence or errors and omissions that have harmed their clients.

Managed care An arrangement between an employer or insurer and selected providers to provide comprehensive health care at a discount to members of the insured group and coordinate the financing and delivery of health care. Managed care uses medical protocols and procedures agreed on by the medical profession to be cost effective. These protocols are also known as *medical practice guidelines*.

Master policy A policy issued to an employer or trustee establishing a group insurance plan for designated members of an eligible group.

Mediation Legal procedure in which a third party or parties attempts to resolve a conflict between two other parties. Mediation can be binding or non-binding.

Medicaid A federal and state public assistance program created in 1965 and administered by the states for people whose income and resources are insufficient to pay for health care.

Medicare Federal program for people sixty-five years or older that pays part of the costs associated with their health care such as hospital stays, surgery, home care and nursing care.

Mortality and expense charge The fee for a guarantee that annuity payments will continue for life.

Mortality table A statistical table showing the death rate at each age, usually expressed per thousand.

Mutual life insurance company A life insurance company without stockholders whose management is directed by a board elected by the policyholders. Mutual companies generally issue participating insurance.

N Non-forfeiture value The value of an insurance policy if it is cancelled or required premium payments are not paid. The value is available to the policyholder either as cash or reduced paid-up insurance.

Non-medical limit The maximum face value of a policy that a given company will issue without a medical examination of the applicant.

Nonparticipating policy A life insurance policy under which the company does not distribute to policyholders any part of its surplus. Premiums usually are lower than for comparable participating policies. Some nonparticipating policies have both a maximum premium and a current lower premium, which reflects anticipated experience more favorable than the company is willing to guarantee. The current premium may change from time to time for the entire block of business to which the policy belongs. See *participating policy*.

Nonproportional reinsurance A form of reinsurance in which the reinsurer's liability depends on the number or amount of claims incurred in a given period.

Operating expenses The cost of maintaining a business, including property, insurance, taxes, utilities and rent, but excludes income tax, depreciation, and other financing expenses.

Options Contracts that allow, but do not oblige, the buying or selling of assets at a certain date at a set price.

Ordinary life insurance A life insurance policy that remains in force for the insured's lifetime, usually for a level premium. Also referred to as whole life insurance. In contrast, term life insurance only lasts for a specified number of years (but may be renewable).

Paid-up insurance Insurance on which all required premiums have been paid; frequently refers to the reduced paid-up insurance available as a nonforfeiture option.

Partial disability benefit A benefit sometimes found in disability income policies providing payment of reduced monthly income if the insured cannot work full time or is unable to earn a specified percentage of predisability earnings due to a disability.

Participating policy A life insurance policy under which the company distributes to policyholders the part of its surplus that its board of directors determines is not needed at the end of the business year. Such a distribution reduces the premium that the policyholder had paid. See policy dividend and nonparticipating policy.

Pensions Programs to provide employees with retirement income after they meet minimum age and service requirements. Life insurers hold some of these funds. Over the last 25 years, the responsibility of funding these retirement accounts has shifted from the employers (who offered defined benefit plans promising a specific retirement income) to employees (who now have defined contribution plans that are financed by their own contributions and not always matched by employers).

Permanent life insurance Generally, insurance that can stay in force for the life of the insured and accrues cash value, such as whole life or endowment. May also be referred to as ordinary life insurance.

Policy The printed document that a company issues to the policyholder, which states the terms of the insurance contract.

Policy dividend A refund of part of the premium on a participating life insurance policy, reflecting the difference between the premium charged and actual experience.

Policyholder/Policy owner The owner of an insurance policy, who may be the insured, a relative of the insured such as a spouse, or a nonnatural person such as a partnership or corporation.

Policy illustration A depiction of how a life insurance policy will work, showing premiums, death benefits, cash values, and information about other factors that may affect policy costs.

0

Ρ

Policy loan The amount a policyholder can borrow at a specified rate of interest from the issuing company, using the insurance policy's value as collateral. If the policyholder dies with the debt partially or fully unpaid, the insurance company deducts the amount borrowed, plus accumulated interest, from the amount payable to beneficiaries.

Policy reserves The funds that a life insurance company holds specifically for fulfilling its policy obligations. Reserves are required by law to be calculated so that, together with future premium payments and anticipated interest earnings, they enable the company to pay all future claims.

Preferred risk A person considered less of a risk than the standard risk.

Premium The payment, or one of the periodic payments, that a policyholder makes to own an insurance policy or annuity.

Premium loan A policy loan for paying premiums.

Proportional reinsurance A form of reinsurance in which the amount ceded is defined at the point the risk is transferred, not at the point of claim. The amount of risk may vary with time by formula.

- **Qualified plan** An employee benefit plan that meets Internal Revenue Code requirements. Employer contributions to such plans are immediately deductible. Contributions to and earnings in such plans are not included in the employee's income until distributed to the employee. Also known as tax-qualified plan.
- **R Rated policy** An insurance policy issued at a higher-than-standard premium rate to cover extra risk, as when the insured has impaired health or a hazardous occupation. Also known as extra-risk policy.

Reduced paid-up insurance A form of insurance available as a nonforfeiture option providing for continuation of the original insurance plan at a reduced amount.

Reinstatement The restoration of a lapsed insurance policy. The company requires evidence of insurability and payment of past-due premiums plus interest.

Reinsurance The transfer of some or all of the insurance risk to another insurer. The company transferring the risk is called the ceding company; the company receiving the risk is called the assuming company or reinsurer.

Reinsure To transfer the risk of potential loss from one insurer to another insurer.

Renewable term insurance Term insurance that can be renewed at the end of the term, at the policyholder's option and without evidence of insurability, for a limited number of successive terms. Rates increase at each renewal as the insured ages.

Reserve The amount required to be carried as a liability on an insurer's financial statement to provide for future commitments under policies outstanding.

Retrocede To cede insurance risk from one reinsurer to another reinsurer.

Retrocessionaire A reinsurer that contractually accepts from another reinsurer a portion of the ceding company's underlying risk. The transfer is known as a retrocession.

Return-to-work program A program that helps persons with activity limitations return to work. Assistance may involve maximizing medical improvement to diminish the effect of limitations, or facilitating job or job-site accommodations, retraining, or other means of taking activity limitations into account.

Rider An amendment to an insurance policy that expands or restricts the policy's benefits or excludes certain conditions from coverage. See *accelerated death benefit* and *accidental death benefit*.

Risk-based capital (RBC) Method developed by the National Association of Insurance Commissioners to measure the minimum amount of capital that an insurance company needs to support its overall business operations. RBC sets capital requirements that consider the size and degree of risk taken by the insurer and presumes that stakeholders will still receive limited payment should insolvency occur. RBC has four components:

Asset risk Determines an asset's default of principal or interest, or fluctuation in market value, as a result of market changes.

Credit risk Measures the default risk on amounts due from policyholders, reinsurers, or creditors.

Off-balance-sheet risk Measures the risk from excessive growth rates, contingent liabilities, or other items not reflected on the balance sheet.

Underwriting risk Calculates the risk from underestimating liabilities from business already written, or inadequately pricing current or prospective business.

Risk classification The process by which a company decides how its premium rates for life insurance should differ according to the risk characteristics of persons insured—their age, occupation, gender, and health status, for example—and how the resulting rules are applied to individual applications. See *underwriting*.

Roth IRA An individual retirement account (IRA) in which earnings on contributions are not taxed at distribution, as long as the contributions have been in the account for five years and the account holder is at least age 59 1/2, disabled, or deceased. Contributions to a Roth IRA are not tax-deductible.

Self-insured plan A retirement plan funded through a fiduciary—generally a bank but sometimes a group of people—which directly invests the accumulated funds. Retirement payments are made from these funds as they fall due. Also known as trusteed plan or directly invested plan.

Separate account An asset account maintained independently from the insurer's general investment account and used primarily for retirement plans and variable life products. This arrangement permits wider latitude in the choice of investments, particularly in equities.

Settlement options The several ways, other than immediate payment in cash, that a policyholder or beneficiary may choose to have policy benefits paid. See *supplementary contract*.

Standard risk A person possessing an average likelihood of loss.

Stock life insurance company A life insurance company owned by stockholders who elect a board to direct the company's management. Stock companies generally issue nonparticipating insurance.

Straight life annuity An annuity whose periodic payouts stop when the annuitant dies.

Straight life insurance Whole life insurance on which premiums are payable for life.

Structured settlement An agreement allowing a person who is responsible for making payments to a claimant to assign to a third party the obligation of making those payments. An annuity contract is often used to make structured settlement payments.

Substandard risk A person who cannot meet the normal health requirements of a standard insurance policy. Protection is provided under a waiver, special policy form, or higher premium charge. Also known as impaired risk.

Supplementary contract An agreement between a life insurance company and a policyholder or beneficiary in which the company retains the cash sum payable under an insurance policy and makes payments according to the settlement option chosen.

Surplus The remainder after an insurer's liabilities are subtracted from it's assets. The financial cushion that protects policyholders in case of unexpectedly high claims.

Term-certain annuity An annuity which makes periodic payments over a fixed number of years. See *annuity certain*.

Т

Term insurance Insurance that covers the insured for a certain period of time, known as the term. The policy pays death benefits only if the insured dies during the term, which can be one, five, ten or even twenty years.

Terminal funded group plans The reserves under an annuity contract for benefits accumulated outside of the contract, such as under a defined benefit retirement plan that has been terminated.

Third-party administrator Outside group that performs administrative functions for an insurance company.

Title insurance Insurance that indemnifies real estate owners in case clear ownership of the property is challenged by the discovery of faults in the title.

Tort A legal term denoting a wrongful act resulting in injury or damage on which a civil court action or legal proceeding may be based.

Total disability The inability of a person to perform all essential functions of his or her occupation, or in some cases any occupation, due to a physical or mental impairment.

U Umbrella policy Coverage for losses beyond the limits of underlying property-casualty, homeowners, or auto insurance policies. While the umbrella applies to losses over the dollar amount in underlying policies, coverage terms are sometimes broader than those specified in the underlying policies.

Unallocated contract A contract under which premiums and contributions are deposited to a fund, rather than used immediately, to purchase annuities for benefit plan participants.

Underwriting The process of classifying applicants for insurance by identifying such characteristics as age, gender, health, occupation, and hobbies. People with similar characteristics are grouped together and charged a premium based on the group's level of risk.

Uninsurable risk Risks for which insurance coverage may not be available.

Universal life insurance A type of permanent life insurance that allows the insured, after the initial payment, to pay premiums at various times and in varying amounts, subject to certain minimums and maximums. To increase the death benefit, the insurance company usually requires the policyholder to furnish satisfactory evidence of continued good health. Also known as *adjustable life insurance*.

V Variable annuity A contract in which the premiums paid are invested in separate accounts which holds funds, including bond and stock funds. The selection of funds is guided by the level of risk assumed. The account value reflects the performance of the funds that the owner has chosen for investment.

Variable life insurance A type of permanent insurance providing death benefits and cash values that vary with the performance of a portfolio of investments. The policyholder may allocate premiums among investments offering varying degrees of risk, including stocks, bonds, combinations of both, and accounts that guarantee interest and principal.

Variable-universal life insurance A type of permanent insurance that combines the premium flexibility of universal life insurance with a death benefit that varies as in variable life insurance. Excess interest credited to the cash value depends on the investment results of separate accounts investing in equities, bonds, real estate, and others. The policyholder selects the accounts to which premium payments are made.

Vesting The right of an employee to all or a portion of the benefits he or she has accrued, even if employment terminates. Employee contributions, as in a 401(k) plan, always are fully vested. Employer contributions vest according to a schedule defined by the plan and are usually based on years of service.

Viatical settlement companies Life insurance companies that purchase life insurance policies at a discounted value from a policyholder who is elderly or terminally ill. The companies then assume the premium payments and collect the face value of the policy upon the death of the person originally insured.

Void When an insurance policy is freed from legal obligations for reasons specified in the policy contract (i.e., a policy could be voided by an insurer if information given by a policyholder is proven untrue).

Waiver of premium A provision that sets conditions under which an insurance company would keep a policy in full force without the payment of premiums. The waiver is used most frequently for policyholders who become totally and permanently disabled.

W

Whole life insurance The most common type of permanent life insurance, in which premiums generally remain constant over the life of the policy and must be paid periodically in the amount specified in the policy. Also known as ordinary life insurance.

Workers compensation Insurance that pays for medical care related to on-the-job injuries and physical rehabilitation. Workers compensation helps cover lost wages while an injured worker is unable to work. State laws vary widely on benefit amounts paid and other compensation provisions.

- 1759 The first life insurance company in the United States—The Corporation for Relief of the Poor and Distressed Presbyterian Ministers and of the Poor and Distressed Widows and Children of Presbyterian Ministers—is established in Philadelphia by the Synod of the Presbyterian Church.
- Benjamin Franklin said: "A policy of life assurance is the cheapest and safest mode of making certain provision for one's family. It is time our people understood and practiced more generally life assurance. Many a widow and orphan have great reason to be thankful that the advantage of life assurance was understood and embraced by the husband and father. A large amount has been paid... to widows and orphans when it formed almost their only recourse."
- 1777 The Corporation for Relief of Poor and Distressed Presbyterian Ministers and of the Poor and Distressed Widows and Children of Presbyterian Ministers voted to lend the Continental Loan Office 5,000 pounds, which amounted to over half the Corporation's total reserves. This loan was used to finance the war effort of the Continental Army during the American Revolution.
- Professor Edward Wigglesworth of Harvard prepares a modified table of mortality based on Massachusetts experience, the first computation of premiums and reserves on a scientific basis in the United States.
- The Insurance Company of North America is chartered as the first general insurance company to sell life insurance in America. In five years, only six policies are issued, and the company discontinues its life insurance business in 1804.
- The Pennsylvania Company for Insurance on Lives and Granting Annuities is incorporated, the first corporation to be organized in America solely for issuing life insurance policies and annuities. The first policy is issued in 1813. The company discontinues issuing life policies in 1872.
- New York Life Insurance and Trust Company, the first American life insurance company to employ agents, is started. The company later discontinues its life insurance business and subsequently is merged with the Bank of New York.
- A charter is granted to New England Mutual Life Insurance Company of Boston—the first to a mutual company in America. The company begins operating in December 1843.

1836	The Girard Life Insurance, Annuity and Trust Company of Philadelphia is established on the new principle of granting policyholders participation in profits. The first policy dividends are allotted in 1844 as additions of insurance to policies in force three or more years. Initially a stock company, the insurer later becomes a trust company.
1840	The New York Legislature passes a bill providing that the proceeds of a policy made out to a widow as beneficiary must be paid to her, exempt from creditors' claims. Enacted into law, this measure strengthens the protective power of life insurance policies.
1842	The Mutual Life Insurance Company of New York is chartered. The company's first policy is issued February 1, 1843, marking the beginning of mutual life insurance as it is known today.
1848	The first policy loans are granted.
184 9	New York passes the first general insurance law.
1851	New Hampshire establishes the first regulatory body to examine the affairs of insurance companies.
1853	Policy valuation tables, which Elizur Wright developed over nine years, are published.
1857	New York City establishes a pension fund for its policemen, the first pension plan covering state or local government employees.
185 9	New York establishes the first state insurance department.
1861	Massachusetts is the first state to require nonforfeiture values as part of life policies.
	The first war risk insurance is written by life insurance companies during the Civil War.
1864	The Manhattan Life Insurance Company is the first U.S. company to write an incontestable clause into a policy.
1866	The Treasury Department rules that death benefits from a life insurance policy are not subject to an income tax enacted in 1862 to fund the Civil War.
1868	The American Experience Table of Mortality is published as part of a New York law. Covering experience from 1843 to 1858, it remains the table most widely used by American companies until the 1940s.
1869	The U.S. Supreme Court holds insurance not to be a transaction in commerce, and affirms the validity of state regulation of insurance.
	The earliest organization of life insurance agents is recorded in Chicago.

1871 The first convention of state insurance commissioners is held in New York City. 1873 The first weekly premium policy is issued in the United States. 1875 The industrial insurance agency system is introduced in the United States. The first pension plan in U.S. industry is established by the American Express Company, financed solely by the employer. 1880 The first formal pension plan supported jointly by employer and employee contributions is established by the Baltimore & Ohio Railroad Company. Cash surrender values are first established by law in Massachusetts. 1892 Columbia University adopts a pension plan for its professors, the first private college retirement plan, effective at age 65 with a minimum of 15 years' service. 1893 The first pension plan for public school teachers is established in Chicago. 1901 Carnegie Steel Company establishes the first enduring pension plan in a manufacturing company. This plan, with some modifications, is taken over by the United States Steel Company in 1911. 1905 The first functioning trade union pension plan is established by the Granite Cutters. Earlier trade union plans, set up by the Pattern Makers (1900) and National Association of Letter Carriers (1902), never paid benefits before dissolution. The Armstrong investigation of life insurance by the New York Legislature results in many changes in insurance laws. 1911 The first group life insurance for employees is introduced. 1913 Modern tax code enacted: maintains public policy of exempting benefits from a life insurance policy. 1917 Government-sponsored life insurance for World War I servicemen is offered under the War Risk Insurance Act. This program subsequently becomes known as U.S. Government Life Insurance. 1920 Congress creates the Federal Civil Service Retirement and Disability Fund. 1921 Metropolitan Life Insurance Company issues the first group annuity contract in the United States. The Revenue Act makes employer contributions to profit-sharing trusts tax-exempt. Its provisions are extended to pension trusts in 1926. 1928 The first examinations are held for chartered life underwriters.

The Social Security Act is enacted.

The Railroad Retirement System is established. It is amended in 1937 to create a unified system for the industry.

- The temporary National Economic Committee begins an investigation of the life insurance business.
- Congress adopts the National Service Life Insurance Act, providing insurance for men and women in service in World War II.
- New York forms the first state guaranty association mechanism for life and health insurance companies.
- The U.S. Supreme Court holds that insurance is commerce, and that when conducted across state lines, it is interstate commerce and subject to federal laws.
- The McCarran-Ferguson Act declares that state regulation of insurance is in the public interest and grants an exemption from antitrust laws to the extent that the business is regulated by state law.
- The U.S. Supreme Court rules that employers are required to bargain on pensions.
- The College Retirement Equities Fund is established as the first variable annuity fund.
- The Participating Annuity Life Insurance Company offers the first variable annuity contracts to the general public.

The Federal Employees' Group Life Insurance Act is introduced, providing group life insurance and accidental death and dismemberment insurance to civilian officers and employees of the U.S. government through private insurance companies.

- Arkansas is the first state to pass laws permitting life insurance companies to issue variable annuities and authorizing the establishment of separate accounts.
- **Early 1960s** Most states now have laws specifically allowing life insurance companies to maintain separate accounts, freeing pension fund investments from some of the limitations applied to companies' general accounts.
- H.R. 10 (Keogh Act), officially known as the Self-Employed Individual Retirement Act, is adopted.
- **1963–64** The Securities and Exchange Commission rules that separate account acquisitions are an issuance of securities subject to regulation under the Securities Act, but tax-qualified group pension plans, including variable annuities, are exempted from the act's registration and prospectus requirements.

1965 The Servicemen's Group Life Insurance Act is introduced, providing members on active duty in the uniformed services with group life insurance underwritten by private insurers through a contract with the Veterans Administration. 1974 The Employee Retirement Income Security Act (ERISA) is signed into law. ERISA primarily protects the benefits of participants in private plans, assures reasonable vesting provisions, and broadens the opportunity to set up plans for the self-employed and workers who have no private retirement plans. 1976 The first individual variable life insurance policy is issued in the United States. 1977 The first universal life insurance policy is issued in the United States. 1978 The Age Discrimination in Employment Act Amendments raise the mandatory retirement age from 65 to 70 for most private-sector and state and local government employees, and eliminate it for federal employees. 1981 The Economic Recovery Tax Act is signed into law. It allows all workers to claim tax deductions, within limits, for retirement savings; liberalizes tax deductions for retirement savings, interest, and dividend exclusions; and reduces or eliminates estate and gift taxes for most individuals. 1982 The Tax Equity and Fiscal Responsibility Act revises the life insurance company taxation formula and repeals the use of modified coinsurance in tax calculations; imposes a penalty tax on certain annuity withdrawals; places limitations on pension plan benefits; and imposes additional restrictions on certain plans. 1983 The U.S. Supreme Court decides in Arizona Governing Committee for Tax-Deferred Annuity and Deferred Compensation Plans v. Norris that employee retirement benefits based on contributions made after August 1, 1983, must be calculated without regard to the employee's gender. The Social Security Amendments increase Social Security taxes and make a portion of Social Security benefits taxable for high-income retirees; limit cost-of-living adjustments under some circumstances; make new federal employees, members of Congress, the president, and other federal officials subject to Social Security taxes; and gradually increase the retirement age to 67 by 2027. 1984 The Retirement Equity Act lowers the minimum age for vesting and participation in retirement plans; requires the spouse's written consent before joint and survivor coverage may be waived under pension plans; and requires payment of a survivor annuity if a vested participant dies before the annuity's starting date. The Tax Reform Act significantly changes the basis on which life insurance companies are taxed and includes universal life insurance within the definition of life insurance, preserving its positive tax treatment.

- **1985** Montana becomes the first state to forbid gender discrimination in the setting of premium rates for all types of insurance, effective October 1.
- **1986** The Tax Reform Act eliminates the tax deductibility of individual retirement account (IRA) contributions for highly paid persons covered by pension plans; reduces the maximum contribution to salary reduction [401(k)] plans; and limits the deductibility of interest paid on loans against corporate-owned life insurance policies.
- **1987** The Revenue Act establishes faster funding requirements for underfunded pension plans, a variablerate Pension Benefit Guaranty Corp. premium, and a lower full-funding limitation for qualified plans.
- 1988 The Technical and Miscellaneous Revenue Act creates a new class of life insurance contract—in which policy loans and surrender payments are subject to taxation similar to that of deferred annuities—and increases the excise tax on excess pension assets upon termination of qualified plans.
- **1990** A significant federal tax is imposed on life insurers' deferred acquisition costs. It becomes known as the DAC tax.
- 1991All 50 states and Puerto Rico now have life and health insurance company guaranty association
mechanisms.
- **1993** The Omnibus Budget Reconciliation Act reduces the amount of annual compensation for calculating retirement benefits to \$150,000 from \$235,840.

In *John Hancock v. Harris Trust and Savings Bank*, the U.S. Supreme Court rules that certain assets in John Hancock Life Insurance Company's general account are "plan assets" and that the company's actions regarding their management and disposition must be judged against ERISA's fiduciary standards.

1995 In *NationsBank v. Variable Annuity Life Insurance Company,* the U.S. Supreme Court rules that annuities are not a form of insurance under the National Bank Act, effectively allowing national banks to sell annuities without limitation.

The Internal Revenue Service states in proposed regulations that bank-issued, hybrid CD-annuities are taxable to purchasers.

1996 The Small Business Job Protection Act (SBA) amends ERISA to clarify the U.S. Supreme Court's decision in *John Hancock v. Harris Trust and Savings Bank* and to protect insurers from lawsuits brought for past actions taken in good-faith reliance on government rules. SBA also contains a wide variety of pension simplification provisions and creates a new SIMPLE plan for small employers.

The Health Insurance Portability and Accountability Act (HIPAA) clarifies the tax treatment of longterm care and accelerated death benefits. HIPAA permits qualified long-term care insurance and services to be treated like accident and health insurance for tax purposes, and treats accelerated death benefits paid to terminally and chronically ill individuals as amounts paid by reason of the death of the insured under a life insurance contract.

1997 The Financial Services Agreement of the General Agreement on Trade in Services locks in liberalization measures in crucial world markets. Its framework reduces or eliminates government barriers that either prevent financial services from being freely provided across national borders or discriminate against firms with foreign ownership.

Section 408A of the Taxpayer Relief Act, beginning January 1, 1998, creates the Roth IRA, in which contributions are not deductible but qualified distributions are excluded from gross income.

- **1998** The Insurance Marketplace Standards Association (IMSA) is launched. The voluntary membership organization promotes high ethical standards in the sale of individual life insurance and individual annuity products through IMSA's Principles and Code of Ethical Market Conduct.
- **1999** The Gramm-Leach-Bliley Financial Services Modernization Act eliminates laws enacted during the Depression to restrict affiliations among insurers, banks, and securities firms. The act clarifies that insurance regulators oversee the insurance activities of all financial institutions and prohibits insurance underwriting in bank operating subsidiaries. The new law also prevents banking regulators from unilaterally broadening banks' insurance powers or circumventing the state insurance regulatory system; requires federal courts to grant equal deference to federal and state regulators in resolving insurance disputes; and permits a mutual life insurer to relocate if its state fails to enact a mutual holding company law.
- **2000** The Electronic Signatures in Global and National Commerce Act ensures that life insurers and their customers can transact business over the Internet by setting national standards and making electronic signatures and records legally binding.

Legislation granting permanent normal trade relations to China is enacted, setting the stage for China's accession to the World Trade Organization.

2001 The Economic Growth and Tax Relief Reconciliation Act, containing pension reform measures and retirement saving incentives, is signed into law. The act raises the limits on contributions to 401(k)-type retirement plans and IRAs, and indexes the limits for inflation; allows those 50 and older to make additional catch-up contributions to 401(k)-type plans and IRAs annually; shortens vesting schedules for 401(k) plans; eases rules on rolling over retirement savings among private-sector, public-sector, and nonprofits' plans; and reduces administrative requirements for small businesses that set up and maintain retirement plans.

The USA Patriot Act is signed into law, requiring life insurers and other financial institutions to establish anti-money-laundering programs with internal procedures and controls, a designated compliance officer, ongoing employee training, and independent audits.

- **2002** The Victims of Terrorism Tax Relief Act is enacted, protecting life insurers that issue structured settlement annuities from adverse tax treatment when a beneficiary transfers the stream of income from such an annuity to a third party.
- **2003** NAIC adopts the Senior Protection in Annuity Transactions Model Law.
- 2004 Congress passes and the President signs the Pension Funding Equity Act of 2004. The bill establishes a two-year temporary replacement for the 30-year Treasury interest rate and becomes effective January 1, 2005. Included in the bill is a permanent repeal of section 809 of the tax code, which affects mutual life insurance companies.
- **2005** Commissioners' 2001 Standard Ordinary Mortality Tables, (2001 CSO Tables), which had been previously adopted by the NAIC, were adopted by a majority of the states, thus putting them in effect for state regulatory purposes. These new tables replace the 1980 CSO Tables.
- **2006** Interstate Insurance Product Regulation Compact Commission was created to develop uniform standards for insurance products, to provide a central clearing house for regulatory review and to enhance cooperation and coordinate efforts between state insurance departments.

Pension Protection Act of 2006 was signed into law by President Bush, strengthening the federal pension insurance system and expanding opportunities for Americans to achieve a secure retirement. The legislation makes permanent increased contribution limits to 401(k)s and IRAs; establishes defined-contribution auto-enrollment; encourages annuities as payout options in employer-sponsored retirement plans; and permits the combination of long-term care insurance and annuities.

- **2010** The Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) is signed into law creating a new Federal Insurance Office within the Department of Treasury. The Federal Insurance Office will be responsible for understanding and advising Congress and the administration on insurance-related issues and helping negotiate international regulatory equivalency agreements.
- **2011** Illinois Insurance Director Michael McRaith is appointed the first director of the new Federal Office of Insurance (FIO) created by the Dodd-Frank Act. He will report to and advise the Secretary of Treasury on all life insurance matters.

Roy Woodall, Jr., was confirmed in September 2011, by the U.S. Senate, to serve as the first independent member with insurance expertise on the Financial Stability Oversight Council (FSOC).

2012 The Supreme Court upholds the health care reform law, its mandate for individual health care coverage and most of its other provisions. By this decision, the Court removed major uncertainties regarding health care reform in the U.S.

The Federal Insurance Office (FIO) establishes the Federal Advisory Committee on Insurance (FACI), a fifteen member board tasked with advising the FIO Director on emerging insurance issues. The FACI convenes its first public meeting in March.

- **2013** The Federal Insurance Office (FIO) releases a report entitled *How To Modernize And Improve The System Of Insurance Regulation In The United States.* The report presents several recommendations of the FIO on how the U.S. system of insurance regulation can be updated for the 21st century.
- 2014 The Insurance Capital Standards Clarification Act of 2014 is signed into federal law. This act clarifies to the Board of Governors of the Federal Reserve that they are not required to apply Section 171 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, which relates to capital requirements on financial institutions, to regulated insurance entities.
- **2015/2016** A new way of calculating life insurance reserves was ushered into existence when the 42nd state adopted a revised Standard Valuation Law. The new method, called principle-based reserves (PBR), becomes effective for new policies issued on or after 1/1/2017, and relies more heavily on computer modeling and company-specific assumptions based on actual past experience.

LIFE INSURANCE RELATED ORGANIZATIONS

(AS OF OCTOBER 2016)

America's Health Insurance Plans (AHIP)

601 Pennsylvania Avenue, NW South Building, Suite 500 Washington, DC 20004 (202) 778–3200 www.ahip.org President and CEO: Marilyn Tavenner

AHIP is a trade association representing companies that finance and deliver health care and provide other health insurance products and services.

American Academy of Actuaries

1850 M Street, NW, Suite 300 Washington, DC 20036 (202) 223–8196 www.actuary.org President: Tom Wildsmith

The Academy is a public policy and communications organization representing actuaries in all practice specialties. It provides a liaison with federal and state governments, relations with other professions, dissemination of public information, and development of standards of professional conduct. It also develops standards of practice through the Actuarial Standards Board, an independent body within the academy. The Academy consists largely of members of the Casualty Actuarial Society, Conference of Consulting Actuaries, Society of Actuaries, and actuaries enrolled under ERISA. Membership criteria include experience and education standards.

The American College

270 S. Bryn Mawr Avenue
Bryn Mawr, PA 19010
(610) 526–1000
www.theamericancollege.edu
President and Chief Executive Officer: Dr. Robert R. Johnson

The College offers professional certification and graduate degree distance-education to those seeking career growth in financial services. The College offers programs of study leading to the award of Chartered Life Underwriter (CLU), Chartered Financial Consultant (ChFC), Registered Health Underwriter (RHU), and Registered Employee Benefits Consultant (REBC) diplomas and professional designations. Grants a Master of Science in Financial Services degree through the Graduate School of Financial Sciences, and a Master of Management degree through the Richard D. Irwin Graduate School of Management. Accredited by the Middle States Association of Colleges and Schools' Commission on Higher Education.

American Council of Life Insurers (ACLI)

101 Constitution Avenue, NW, Suite 700 Washington, DC 20001–2133 (202) 624–2000 www.acli.com Chairman: Peter Schaefer (Hannover Re) Chairman-Elect: Mark Mullin (Transamerica Corporation)

President and Chief Executive Officer: Dirk Kempthorne

The American Council of Life Insurers (ACLI) is a Washington, D.C.-based trade association representing approximately 280 legal reserve life insurer and fraternal benefit society member companies operating in the United States. ACLI advocates in federal, state and international forums. Its members represent 95 percent of the industry assets, 92 percent of life insurance premiums, and 97 percent of annuity considerations in the United States. In addition to life insurance, annuities and other workplace and individual retirement plans, ACLI members offer long-term care and disability income insurance, and reinsurance.

American Fraternal Alliance (AFA)

1301 West 22nd Street, Suite 700 Oak Brook, IL 60523 (630) 522–6322 www.fraternalalliance.org Chairman: William R. O'Toole Vice-Chair: Kevin Marti

The Fraternal Alliance is the association and voice of fraternal benefit societies, which provides education, guidance, standards, and information on best practices and governance.

American Risk and Insurance Association (ARIA)

716 Providence Road Malvern, PA 19355–3402 (610) 640–1997 www.aria.org President: Paul Thistle President-Elect: Richard Phillips

ARIA is a society of insurance educators and others interested in risk and insurance education and research.

American Society of Pension Professionals & Actuaries (ASPPA)

4245 N. Fairfax Drive, Suite 750 Arlington, VA 22203 (703) 516–9300 www.asppa.org President: Joseph A. Nichols President-Elect: Richard A. Hochman

ASPA educates pension actuaries, consultants, administrators, and other benefits professionals, and preserves and enhances the private pension system in developing a cohesive and coherent national retirement income policy. Offers an examination program for employee benefits professionals and represents the interests of its members before appropriate forums.

■ Association of Home Office Underwriters (AHOU)

1800 M Street, NW, Suite 400 Washington, DC 20036 (202) 962-0167 www.ahou.org President: Traci Davis Executive Vice President: Tim Ranfranz

The mission of the AHOU is to advance the knowledge of sound underwriting of life and disability insurance risks, toward which end it holds meetings, publishes papers and discussions, and promotes educational programs. The association also provides valuable information sharing and networking opportunities to its members.

Conference of Consulting Actuaries

3880 Salem Lake Drive, Suite H Long Grove, IL 60047–5292 (847) 719–6500 www.ccactuaries.org President: Donald J. Segal President-Elect: Donald E. Fuerst

The conference advances the quality of consulting practice, supports the needs of consulting actuaries, and represents their interests. Comprises consulting actuaries in all disciplines.

Consumer Credit Industry Association (CCIA)

6300 Powers Ferry Road, Suite 600-286 Atlanta, GA 30339 (678) 858–4001 www.cciaonline.com Chair: Dick Williams President: Jim Pangburn

CCIA is a national trade organization for insurers that underwrite consumer credit insurance in the areas of life, accident and health, property, and involuntary unemployment insurance. Acts to preserve, promote and enhance the availability, utility, and integrity of insurance and related products and services delivered in connection with financial transactions.

Financial Services Roundtable

600 13th Street, NW, Suite 400 Washington, DC 20005 (202) 289–4322 www.fsroundtable.org President and CEO: Tim Pawlenty

The Roundtable is a forum for financial industry leaders to share information and inform public policy with matters relating to the financial services industry.

Global Federation of Insurance Associations (GFIA)

c/o Insurance Europe rue Montoyer 51 B-1000 Brussels, Belgium http://www.gfiainsurance.org/en/ Chair: Governor Dirk Kempthorne (ACLI)

GFIA is a non-profit association established to represent national and regional insurance associations that serve the general interests of life, health, general insurance and reinsurance companies and to make representations to national governments, international regulators, and others on their behalf.

The Griffith Insurance Education Foundation

720 Providence Rd, Suite 100 Malvern, PA 19355 (855) 288-7743 www.griffithfoundation.org Chairman: James Jones Executive Director: Kevin Brown

The Foundation was founded at a major mid-western university to develop and support an insurance and risk management program. It promotes the teaching of risk management and insurance by colleges, universities, and other institutions of higher learning, and student participation in these programs, and offers education programs for public policy-makers on managing risks through insurance mechanisms.

Health Insurance Association of America (HIAA)

See America's Health Insurance Plans (AHIP).

■ Insurance and Financial Communicators Association (IFCA)

515 East Grant Rd, Suite 141 Box 250 Tucson, AZ 85705 (602) 350-0717 www.ifcaonline.com President: Jaimee Niles

IFCA is an international organization dedicated to the ongoing professional development of its members in life insurance and related financial services communications. The association operates on a volunteer basis and offers programs and activities for its members. IFCA's primary objective is to encourage and promote the exchange of experience and ideas through an extensive program of formal schools, workshops, seminars, newsletters, research studies, networking, international awards competition, and meetings.

■ Insurance Accounting and Systems Association (IASA)

IASA International Office 3511 Shannon Road, Suite 160 Durham, NC 27707 (919) 489–0991 www.iasa.org President: Tim Morgan

IASA works to enhance individual, organizational, and industry effectiveness by facilitating the exchange of information and ideas among insurance-related professionals.

■ Insurance Information Institute (III)

110 William Street New York, NY 10038 (212) 346–5500 www.iii.org President and CEO: Sean Kevelighan

The mission of III is to improve public understanding of insurance. III provides definitive insurance information and statistics for government, media, educational institutions, and the public.

Insured Retirement Institute (IRI)

1100 Vermont Avenue, NW, 10th Floor Washington, DC 20005 (202) 469-3000 www.irionline.org Chairman: Robert DeChellis President: Catherine J. Weatherford

With over 350 members, IRI represents all segments of the annuity and variable life industry. It serves as a forum for the exchange of information, and provides the public, media, and industry with information on the benefits of annuities and related products.

■ International Association of Insurance Supervisors (IAIS)

c/o Bank for International Settlements CH-4002 Basel Switzerland +41 61 225 7300 Secretary General: Yoshihiro Kawai

The IAIS is a voluntary membership organization composed of insurance supervisors and regulators from around the world. The organization's goal is to create a consistent and effective system of global insurance regulation to promote policyholder protections and financial stability.

International Claim Association (ICA)

1800 M Street, NW, Suite 400 South Washington, DC 20036 Phone: (202) 452–0143 www.claim.org President: David W. Grannan President-Elect: Erin M. Worthington

ICA is composed of life and health insurance company officers and employees who handle their companies' claims function.

Life Communicators Association

See Insurance and Financial Communicators Association (IFCA).

■ Life Insurers Council (LIC)

6190 Powers Ferry Road, Suite 600 Atlanta, GA 30339 (770) 984–3724 http://loma.org/lic President & CEO: Robert A. Kerzner

A council of LOMA, LIC is an association of insurance companies that serve the basic insurance needs of the general public, including the underserved market, through various distribution methods by promoting standards of business conduct which are in the best interests of policyholders; representing its members by addressing legislative, regulatory and consumer issues; and promoting the interchange of experience and ideas for the betterment of the public and the insurance industry.

LIMRA International, Inc.

300 Day Hill Road Windsor, CT 06095–4761 (860) 688–3358 www.limra.com President and Chief Executive Officer: Robert A. Kerzner

LIMRA is a member-owned organization dedicated to meeting the marketing information needs of companies involved in marketing annuity, disability, health, life, mutual fund, and retirement savings products. LIMRA works to improve the efficiency of life insurance distribution through scientific management methods, serves as the principal source of industry sales and marketing statistics, conducts research, provides consulting and management educational services, and prepares a wide range of publications.

LOMA (Life Office Management Association)

6190 Powers Ferry Road, Suite 600 Atlanta, GA 30339 (770) 951–1770 www.loma.org President and Chief Executive Officer: Robert A. Kerzner

An international association through which more than 1,200 insurance and financial services companies from over 80 countries engage in research and educational activities to improve company operations. Members are involved in life and health insurance, managed care, annuities, pensions, banking, securities, and other financial services areas. LOMA is committed to working as partners with members worldwide to improve management and operations through quality employee development, research, information sharing, and related products and services.

■ MIB Group, Inc.

50 Braintree Hill Park, Suite 400 Braintree, MA 02184–8734 (781) 751-6000 www.mib.com

Formerly the Medical Information Bureau, MIB is a nonprofit association founded by medical directors to provide a central information exchange for more than 600 member life insurance companies.

MDRT

325 W. Touhy Avenue Park Ridge, IL 60068–4265 (847) 692–6378 www.mdrt.org

MDRT (formerly Million Dollar Round Table) is composed of life insurance agents who consistently sell a predetermined amount of life insurance annually and maintain membership in the National Association of Insurance and Financial Advisors.

National Association of Insurance Commissioners (NAIC)

1100 Walnut Street, Suite 1500 Kansas City, MO 64106–2197 (816) 842–3600 www.naic.org President: John M. Huffn Chief Executive Officer: Ted Nickel

NAIC is an organization of state insurance regulators from the 50 states, the District of Columbia and the four U.S. territories. NAIC functions as a regulatory support organization and serves the public interest by promoting uniformity of legislation and regulation, facilitating the fair and equitable treatment of insurance consumers, promoting the reliability, solvency and financial solidity of insurance institutions, and supporting and improving state regulation of insurance.

■ National Association of Insurance and Financial Advisors (NAIFA)

2901 Telestar Court Falls Church, VA 22042–1205 (877) 866–2432 www.naifa.org President: Paul R. Dougherty Chief Executive Officer: Kevin M. Mayeux

NAIFA is a national nonprofit organization representing the interests of more than 200,000 insurance and financial advisors nationwide, through its federation of over 600 state and local associations. NAIFA is the nation's largest financial services membership association. Promotes high ethical standards, supports legislation in the interest of policyholders and agents, participates in community service, and provides agent education seminars and sales congresses.

National Association for Variable Annuities (NAVA)

See Insured Retirement Institute (IRI)

National Fraternal Congress of America (NFCA)

See American Fraternal Alliance (AFA)

National Organization of Life and Health Insurance Guaranty Associations (NOLHGA)

13873 Park Center Road, Suite 505 Herndon, VA 20171 (703) 481–5206 www.nolhga.com Chairman: Lee Douglass. Vice-Chair: Deborah Bello

NOLHGA is a voluntary association comprised of the life and health insurance guaranty associations of all 50 states, the District of Columbia, and Puerto Rico. This nonprofit organization assists its members in handling multi-state insolvencies, coordinates their resolution, and provides a forum for resolving issues and problems related to the operation of state life and health insurance guaranty associations.

Society of Actuaries (SOA)

475 N. Martingale Road, Suite 600 Schaumburg, IL 60173 (847) 706–3500 www.soa.org President: Craig W. Reynolds

SOA is an organization of skilled professionals applying mathematical and economic probabilities to financial security programs. Educates and qualifies candidates to become members, provides continuing education and professional development programs, promotes and publishes actuarial research, and maintains and enforces a professional conduct code for its members. The Society determines membership by successful completion of a rigorous set of examinations leading to the designation of Associate or Fellow in the society.

Society of Financial Service Professionals (SFSP)

3803 West Chester Pike, Suite 225 Newtown Square, PA 19073–3239 (610) 526–2500 www.financialpro.org President: Anthony R. Bartlett President-Elect: James S. Aussem

SFSP is an organization of professionals who have earned designations in the fields of insurance and financial services. The Society comprises agents, company executives, insurance regulators, educators, attorneys, certified public accountants, and bank trust officers, who participate in local chapters.

S.S. Huebner Foundation for Insurance Education

Department of Risk Management and Insurance Georgia State University PO Box 4036 Atlanta, GA 30302-4036 (404) 413-7462 http://huebnerfoundation.org/ Director: Conrad S. Ciccotello

The foundation's mission is to strengthen insurance education at the university level by increasing the number of professors specializing in insurance. The foundation makes fellowship grants for doctoral study and publishes research studies in the field of insurance.

AMERICAN COUNCIL OF LIFE INSURERS 101 Constitution Avenue, NW, Suite 700 Washington, DC 20001–21133 acli.com
