

5 EXPENDITURES

Life insurance company expenditures include benefit payments and other contract payments, operating expenses, taxes, additions to reserves, and investment expenses. Contract payments accounted for 74 percent of expenditures at \$507 billion in 2009 (Table 5.1, Figure 5.1). Additions to reserves were \$50 billion at 7 percent in 2009.

Operating expenses comprised 15 percent of 2009 total expenditures, taxes claimed 2 percent and investment expenses claimed 2 percent. Each expenditure category is detailed in this chapter, with the exception of reserves, which are discussed in Chapter 3.

CONTRACT PAYMENTS From Life Insurance Policies

Several factors affect the pattern of life insurance benefit payments. Primary among them are changes in the death rate of policyholders and the growth in group life insurance and other term insurance policies that do not incorporate a cash value.

These payments have increased steadily for many years, reflecting greater use of life insurance not only to provide funds for the family whose breadwinner dies, but also for family financial needs during the policyholder's lifetime.

Nationally, increasing life insurance ownership has been the main reason for the almost uninterrupted rise in life insurance death payments over the years, despite a general decline in death rates among policyholders.

To Beneficiaries

During 2009, life insurers paid \$59 billion to beneficiaries of policyholders who died, a slight decrease from 2008 (Table 5.2). Of this total, individual life insurance policies accounted for nearly two-thirds and provided \$38 billion (64%). Group life insurance payments to beneficiaries ranked second at \$21 billion, or 35 percent of total death payments. Benefits paid under short-term individual and group credit life insurance policies (on loans of 10 years' or less duration) totaled \$527 million in 2009.

To Policyholders

Although the basic purpose of life insurance is to protect against the economic risks of death, it can also generate value for the individual policyholder. Cash surrender values paid on life insurance policies terminated voluntarily during 2009 declined by 18 percent to \$48 billion from a year earlier (Table 5.2).

Policyholder dividends represent the return of part of the payments that policyholders made on policies sold on a participating basis, and reflect the portion not needed by the company after payment of claims, additions to reserves, and administrative expenses. Dividends accounted for \$14 billion, or 11 percent of payments from life insurance policies in 2009.

Endowment insurance guarantees that the policy's face amount will be paid by the insurance company regardless of whether the insured dies during the policy's term, as long as premiums are paid as required. These policies specify a maturity date. Matured endowment payments totaled \$546 million in 2009.

Other payments, including disability payments and retained assets under life insurance policies, totaled \$551 million in 2009.

From Annuity Contracts

Annuity benefit payments decreased by 4 percent to \$67 billion in 2009 from 2008 (Table 5.3). Beginning in 2001, payments and withdrawals from deposit-type contracts are no longer reported as expenditures but directly as a deduction from reserves.

Sixty percent of the annuity benefit payments, or \$40 billion, was paid to individual annuity owners, while \$25 billion, or 37 percent, was paid to group annuity owners. The remainder was paid under supplementary contracts with life contingencies—an agreement between an insurer and a life insurance policyholder or beneficiary in which the beneficiary chooses to receive the policy's proceeds over a lifetime rather than in a lump sum.

Life insurers paid \$183 billion on voluntarily terminated annuities in 2009, \$3 billion in dividends to annuity owners, and small amounts of death benefits, disability benefits, and matured endowments.

From Health Insurance Policies

Health insurance has become a notable aspect of U.S. life insurers' services. Life insurance companies paid \$122 billion in health insurance benefits to Americans in 2009—\$71 billion under group contracts and \$51 billion under individual policies (Table 5.4). Life insurers' total health insurance benefit payments to Americans increased 3 percent from 2008.

These statistics do not include disability payments under life insurance policies, health insurance and accidental death and dismemberment payments by casualty and other health insurance companies, or administrative-service-only arrangements.

OPERATING EXPENSES

Operating expenses of life insurance companies include commissions to agents and home- and field-office expenses. In 2009, agent commissions comprised 7

percent of expenditures at \$50 billion (Table 5.1). Home- and field-office expenses were \$56 billion, or 8 percent of total expenditures.

Of total office expenses, \$36 billion, or 64 percent, was in salaries and payments to employee and agent benefit plans (Table 5.5). In 2009, life insurers also spent \$7 billion on office equipment and supplies, \$3 billion on office rent, \$3 billion on fees associated with policy issuance and claim settlement, \$3 billion on advertising, and \$1 billion on travel.

TAXES

Life insurance companies incurred \$15 billion in taxes to federal, state, and local governments in 2009 (Table 5.6). The financial market downturn in 2008 created huge capital losses and tax credits for life insurers, resulting in more than \$650 million in federal income tax credit. Other types of taxes changed slightly from their 2008 levels. Significant year-to-year variation in federal income taxes is largely due to changes in capital gain/loss obligations.

Another large tax obligation of life insurers' is payment of taxes on premiums that companies collect in each state. In 2009, U.S. life insurers incurred \$4 billion in state taxes on premiums collected from life, health, and annuity business.

As employers of over one-third of a million home-office personnel, U.S. life insurers also incurred \$2 billion in Social Security taxes in 2009. This figure does not include Social Security taxes paid by employees or self-employed agents.

Miscellaneous taxes, licenses, and fees accounted for more than \$1 billion in 2009. These taxes do not include amounts associated with investment management.

INVESTMENT EXPENSES

Expenses, fees, and taxes associated with investment management totaled \$12 billion in 2009 (Table 5.7).

Depreciation on invested assets is the largest category at about \$2.6 billion followed by interest at \$2.1 billion.

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

*Corrected to include industrial policies.

‡Includes fraternal benefit societies.

¹Prior to 1973, death payments under credit life are included in individual and group categories.

Table 5.10

Health Insurance Benefit Payments by Life Insurers, by Year (millions)

Year	Group	Individual	Total
1948	\$225	\$101	\$326

Source: ACLI tabulations of National Association of Insurance Commissioners (NAIC) data, used by permission.

Notes: NAIC does not endorse any analysis or conclusions based on use of its data. Figures exclude policy dividends. 1994–96 data have been revised to reflect the addition of life insurers that sell accident and health insurance. Data represent U.S. life insurers and, as of 2003, fraternal benefit societies.

‡Includes fraternal benefit societies.
