OVERVIEW

U.S. life insurance companies sell the vast majority of life insurance and annuities purchased in the United States. Fraternal organizations and federal government agencies are also in the marketplace, and certain Canadian life insurers with U.S. legal reserves are allowed to sell insurance directly from their Canadian offices to U.S. purchasers. Data from Canadian companies are not included in this chapter.

At the end of 2022, 727 life insurance companies were in business in the United States (Table 1.1). The number of active companies peaked in 1988 (Table 1.7), and has since fallen steadily, mostly due to company mergers and consolidations. This streamlining has helped to reduce operating costs and general overhead, and has significantly increased efficiency.

ORGANIZATIONAL STRUCTURE Stock and Mutual Life Insurers

Most life insurers are organized as either stock or mutual companies. Stock life insurance companies issue stock and are owned by their stockholders. Mutual companies are legally owned by their policyholders and consequently do not issue stock.

Stock life insurers can be owned by other stock life insurance companies, mutual life insurance companies, or companies outside the life insurance industry. Only policyholders own a mutual company, however. If a stock company is owned by a mutual company, that stock company is categorized as a mutual company. The majority of life insurers are stock companies—538, or 74 percent of the industry (Table 1.1). Many life insurers are affiliated with other life and non-life insurance companies in fleets with a single owner.

Besides consolidation, another trend in the life insurance industry is demutualization and the formation of mutual holding companies—a structure that allows easier and less expensive access to capital. In creating a mutual holding company, the mutual insurer either starts a stock insurance company or acquires a stock company. For data in this chapter, mutual holding companies are included in the totals for pure mutual companies.

Together, stock and mutual life insurers provide most of the insurance and annuities underwritten by U.S. organizations (Table 1.2). Mutual companies had \$8 trillion of life insurance in force in 2022 and stock life insurers, \$13.2 trillion. Fraternal societies and other type companies underwrite the remainder of U.S. insurance.

Other Life Insurance Providers

Fraternal benefit societies provide both social and insurance benefits to their members. These organizations are legally required to operate through a lodge system, allowing only lodge members and their families to own the fraternal society's insurance. In 2022, there were 69 fraternal life insurance companies that had \$359 billion of life insurance in force and \$196 billion in assets (Tables 1.1 and 1.2).

The Department of Veterans Affairs provides protection to U.S. veterans under six insurance programs: U.S. Government Life Insurance, National Service Life Insurance, Veterans' Special Life Insurance, Service-Disabled Veterans Insurance, Veterans' Reopened Insurance, and Veterans' Mortgage Life Insurance. The federal agency also oversees three life insurance programs for members of the uniformed services: Servicemembers' Group Life Insurance, SGLI Family Coverage, and Veterans' Group Life Insurance.

Veterans' Special Life Insurance in force totaled \$717 million in 2022 (Table 1.3). National Service Life Insurance, for veterans of World War II and those covered by the Insurance Act of 1951, totaled \$738 million. Service-Disabled Veterans Insurance—for veterans separated from service after April 1951 who have a service-connected disability but are otherwise insurable—had \$2.9 billion of insurance in force in 2022. The largest life insurance plan, Servicemembers' Group Life Insurance, had \$805 billion of insurance in force with 2.2 million policies at year-end 2022 (Table 1.3).

EMPLOYMENT

The insurance industry plays an important role in the nation's economy. In 2022, U.S. insurers employed 2.9 million individuals in all of their branches, a 2.9 percent increase from a year earlier (Table 1.4).

Government data on employees of insurance agencies and home offices in 2022 show 1.6 million insurance home-office personnel (327,500 in life insurance) and 1.3 million insurance agents, brokers, and service personnel.

FOREIGN OWNERSHIP

The proportion of life insurance companies operating in the United States that are foreign-owned was 14 percent in 2022 (Table 1.5).

Practically, the same countries have fielded the major foreign players in the U.S. market since the mid-1990s. Among life insurance companies operating in the United States during 2022, Canada controlled 25 companies; Bermuda, 24; Japan, 15; Switzerland, 10; Cayman Islands, 9; the United Kingdom, 7; Germany, 5; France, 3; the Netherlands, 2; Panama, 1; and Spain, 1 (Table 1.6).
